

Welcome to Innovation World.

SOLVAY
INNOVATION WORLD

Ideally located to the north-east of Brussels, close to the Brussels Ring and within easy distance of the International airport, the Solvay Research & Technology site is home to 1000 researchers and technologists in 120,000 m² of labs, offices and workshops across a 22 hectare park.

Solvay Research & Technology's approach fits perfectly with the objectives of the European Commission and of the Brussels Capital-Region, supporting R&D in small-sized innovative companies which are the real drivers of new industrial activities.

a Passion for Progress®

Solvay is opening the Group's largest Research and Development Centre to start-ups.

**To enable start-up companies to concentrate
on their core competencies,**

Solvay Research & Technology is offering research premises and support facilities on particularly favorable terms for the first two years, under an agreement in which the start-up retains full autonomy and full ownership rights to its research.

In this unique initiative, the main research centre of a world size group, a leader in its fields in chemistry, plastics and pharmacy, is supporting and encouraging research on the frontiers of its own activities.

START-UP

Solvay
Research & Technology
offers :

Analytical services with up-to-date know-how and equipment for qualitative and quantitative analysis

A modern visitor infrastructure with fully-equipped meeting and videoconference rooms, secure parking areas, etc.
