

**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549**

FORM 10-Q

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended September 30, 2012

Commission file number 1-12372

CYTEC INDUSTRIES INC.

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

22-3268660
(I.R.S. Employer
Identification No.)

Five Garret Mountain Plaza
Woodland Park, New Jersey
(Address of principal executive offices)

07424
(Zip Code)

Registrant's telephone number, including area code (973) 357-3100

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes No .

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No .

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a small reporting company. See definition of "accelerated filer, large accelerated filer, and smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Small reporting company

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

There were 45,590,943 shares of common stock outstanding at October 31, 2012.

CYTEC INDUSTRIES INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

(Currencies in millions, except per share amounts, unless otherwise indicated)

1. BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements included herein have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission for reporting on Form 10-Q and accounting principles generally accepted in the United States of America ("U.S. GAAP") for interim reporting. Certain information and footnote disclosures normally included in our annual consolidated financial statements have been condensed or omitted pursuant to such rules and regulations. Financial statements prepared in accordance with U.S. GAAP require management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities, revenues and expenses and other disclosures. In the opinion of management, these condensed consolidated financial statements include all normal and recurring adjustments necessary for a fair presentation of the financial position and the results of our operations and cash flows for the interim periods presented. The results of operations for any interim period are not necessarily indicative of the results of operations for the full year. The quarter results include the recently acquired Umeco plc as described in Note 4, Coating Resins as a discontinued operation, and the sale of the pressure sensitive adhesives product line as described in Note 5. These condensed consolidated financial statements should be read in conjunction with the Consolidated Financial Statements and Notes to Consolidated Financial Statements contained in the Company's 2011 Annual Report on Form 10-K, as updated by the Current Report on Form 8-K filed with the SEC on April 19, 2012, related to the Company's changes in reportable segments. All amounts reported in these financial statements are presented according to the realigned reportable segments, as described in Note 15. Unless indicated otherwise, the terms "Company," "Cytec," "we," "us" and "our" each refer collectively to Cytec Industries Inc. and its subsidiaries.

2. RECENTLY ADOPTED ACCOUNTING PRONOUNCEMENTS

In May 2011, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2011-04. The amendments in this ASU generally represent clarifications of fair value measurement, but also include some instances where a particular principle or requirement for measuring fair value or disclosing information about fair value measurements has changed. This ASU results in common principles and requirements for measuring fair value and for disclosing information about fair value measurements. On January 1, 2012, we adopted these amendments on a prospective basis and there was no impact on our consolidated financial statements.

In June 2011, the FASB issued ASU No. 2011-05, which requires entities to present items of net income and other comprehensive income either in a single continuous statement of comprehensive income or in two separate, but consecutive, statements of net income and other comprehensive income. This ASU eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholders' equity. The amendments in this ASU do not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. ASU 2011-05 was subsequently amended by ASU No. 2011-12, which deferred the requirement for companies to present reclassification adjustments for each component of accumulated other comprehensive income in both other comprehensive income and net income on the face of the financial statements. On January 1, 2012, we adopted the effective portions of ASU No. 2011-05, which are reflected in these financial statements.

3. CHANGE IN DEPRECIATION METHOD

Effective January 1, 2012, we changed our method of depreciation for the majority of our North American fixed assets from straight line composite depreciation to straight line by individual asset.

Historically, we had used the composite depreciation method for the Plants, Equipment and Facilities at the majority of our North American facilities. Under this method, all similar assets across these locations were combined into common pools and depreciated under composite depreciation rates. Recent business divestitures and sales of assets had significantly reduced our composite asset base, and during 2011, we performed a full physical inventory of fixed assets at our composite locations. As part of this analysis, where appropriate, we made changes to certain asset records in our fixed assets system effective January 1, 2012 to segregate individual assets that had been installed together and had previously been combined into one item. We also reviewed the estimated useful lives of our assets at this more specific level.

We believe that the straight line depreciation method for individual assets is preferable to the composite method because it is a more precise method of allocating historical cost and will result in a consistent depreciation policy for all of our locations.

As a result, the useful lives of our assets are now generally estimated to range from 5 to 30 years for equipment and from 10 to 38 years for buildings. This change in the method of depreciation is considered a change in accounting estimate inseparable from a change in accounting principle, and will result in changes to our depreciation expense prospectively.

[Table of Contents](#)

For the three and nine months ended September 30, 2012, the changes described above resulted in an increase over our historical depreciation expense of approximately \$1.3 and \$3.8, respectively, before taxes, or approximately \$0.9 and \$2.5, respectively, after taxes, which represents a decrease of \$0.02 and \$0.05, respectively, to our basic and diluted earnings per share for the periods.

4. ACQUISITIONS

Acquisition of Umeco plc

On July 20, 2012, we completed the acquisition of all of the outstanding shares of Umeco plc ('Umeco'), an international provider of composite and process materials, in an all-cash transaction at a cost of approximately \$423.8. To fund the transaction, we used approximately \$170.0 from the draw-down of our existing \$400.0 revolving credit facility (the "Revolving Credit Facility") with the balance funded by cash on hand. The acquisition is intended to strengthen our position as a leading manufacturer of composite materials, while offering significant opportunities for growth and value creation, particularly in industrial composites and process materials. The acquired Umeco business is being reported as a separate segment.

The acquisition is accounted for under the acquisition method of accounting in accordance with the FASB's Accounting Standards Codification ("ASC") Topic 805, *Business Combinations*. As such, the Umeco assets acquired and liabilities assumed are recorded at their acquisition-date fair values. Acquisition-related transaction costs are not included as a component of consideration transferred, but are accounted for as an expense in the period in which the costs are incurred. Any excess of the acquisition consideration over the fair value of assets acquired and liabilities assumed is allocated to goodwill.

The preliminary allocation of the total purchase price as of July 20, 2012 is summarized below:

Cash	\$ 3.0
Trade receivables	65.2
Inventories	57.2
Other current assets	20.0
Plants, equipment and facilities	69.4
Amortizable intangible assets	183.4
Goodwill	182.9
Deferred tax assets	0.4
Other non-current assets	3.5
Deferred tax liabilities	(59.2)
Other current and non-current liabilities	(102.0)
Total acquisition consideration allocation	<u>\$ 423.8</u>

Based on our preliminary fair value measurement of assets acquired and liabilities assumed, we allocated \$182.9 to goodwill for the significant opportunities for growth and value creation by expanding our presence in the industrial composites sector, as well as the expected synergies from combining the acquired business with our existing business. All of the goodwill was assigned to the new segment. For tax purposes, the estimated amount of goodwill deductible for tax purposes over a 5 year period is \$7.1. The estimated goodwill non-deductible for tax purposes is approximately \$175.8.

The following information provides details about the estimated step-up in fair value and/or the estimated fair value at the acquisition date for some key balance sheet items.

Inventories

As of the effective date of the acquisition, inventory is required to be measured at fair value. Raw materials and work in process are valued at book value which is assumed to be a reasonable proxy for fair value. The fair values for finished goods inventory were determined based on estimated selling prices less the sum of (a) costs of selling and (b) a reasonable profit allowance for the selling effort. The estimated net step-up in fair value for finished goods was \$4.5.

Deferred taxes

In connection with the acquisition of Umeco, we acquired the stock of Umeco and therefore inherited the historical tax basis of its assets and liabilities, as well as its other tax attributes. As a result, we established deferred tax assets and liabilities with respect to the step-up to fair value of assets and liabilities for book purposes. We also inherited various tax uncertainties and valuation allowances, which were adjusted to reflect our judgments and estimates regarding the ultimate resolution of the items and consideration of the combined company activities. Any adjustments to our estimate of assets acquired and liabilities assumed may result in a change to our deferred tax assets and liabilities.

Property and equipment

As of the effective date of the acquisition, property and equipment are required to be measured at fair value. It is assumed that all property and equipment will be used in a manner that represents the highest and best use of those assets. The fair value of land assets was primarily determined through use of the market approach, while the fair value of land improvements and personal property (machinery and equipment and fixed assets – other) was primarily determined through use of the cost approach and corroborated with an income approach when appropriate. Our fair value adjustment to property and equipment has been made by obtaining an understanding of the nature, amount and type of Umeco property and equipment as of July 20, 2012. The estimated step-up in fair value for property and equipment was \$6.4. The estimated step-up in fair value is preliminary and subject to change as we confirm the physical existence and condition of certain property and equipment and finalize assumptions.

Intangible assets include the following:

	Estimated Fair Value	Remaining Useful Lives (Years)
Customer relationships	\$ 144.2	16
Technology - Structural Materials: Aerospace & Defense	\$ 20.4	19
Technology - Structural Materials: Other industries	\$ 7.8	5
Trademarks and trade names	\$ 11.0	8

[Table of Contents](#)

It is assumed that all intangible assets will be used in a manner that represents the highest and best use of those assets. The preliminary fair value of intangible assets was determined primarily using income approaches. This included the multi-period excess earnings valuation method for customer relationships and the relief-from-royalty valuation method for trademarks and trade names, and technology assets. Some of the more significant assumptions used in the development of intangible asset values, as applicable, include the amount and timing of projected future cash flows (including net sales, cost of sales, marketing, administrative and development expenses and working capital); the discount rate selected to measure the risks inherent in the future cash flows; the assessment of the asset's life cycle and the competitive trends impacting the asset; and royalty rates. The fair values of the intangible assets included above are preliminary and subject to change.

The fair value of the assets acquired includes trade receivables of \$65.2, virtually all of which are expected to be collected.

The purchase price allocation for the Umeco acquisition is preliminary and will be finalized upon collection of additional information regarding the fair values of assets and liabilities acquired. The primary areas of the preliminary purchase price allocation that are not yet finalized include fair values of certain tangible assets and liabilities acquired, identifiable intangible assets, certain legal matters, income and non-income based taxes, and residual goodwill. During the three and nine months ended September 30 2012, we recognized expenses for acquisition related costs of approximately \$4.3 and \$7.2, respectively. These costs are included in the Unaudited Consolidated Statements of Income for the period ended September 30, 2012 under "Administrative and general." From the acquisition date through September 30, 2012, we recorded net sales of \$66.8 for the Umeco segment, and a corresponding net operating loss of \$1.7, which includes the expensing of the aforementioned net step-up in fair value for purchased finished goods of \$4.5.

The assets and liabilities arising from contingencies recognized as of the acquisition date are not significant to the consolidated financial statements.

Pro Forma Financial Information

The results of operations of Umeco have been included in the consolidated statements of operations since the acquisition date of July 20, 2012. The following table reflects the unaudited pro forma consolidated results of operations as if the acquisition had taken place on January 1, 2011:

	Three Months Ended		Nine Months Ended	
	September 30		September 30	
	2012	2011	2012	2011
Net revenue	\$473.8	\$446.6	\$1,425.5	\$1,310.1
Net income attributable to Cytec	\$ 42.7	\$ 27.5	\$ 89.0	\$ 61.3
Diluted earnings per share from continuing operations	\$ 0.90	\$ 0.56	\$ 1.90	\$ 1.23

These amounts have been calculated after applying Cytec's accounting policies and adjusting the results of Umeco to reflect the additional depreciation and amortization that would have been charged assuming the fair value adjustments to property, plant and equipment, and intangible assets had been applied from January 1, 2011 with the consequential tax effects.

[Table of Contents](#)

For the three months and nine months ended September 30, 2012, material non-recurring pro forma adjustments include the removal of costs related to the acquisition of Umeco of \$14.9 and \$19.0, respectively (including \$10.6 and \$11.8 of acquisition costs included in legacy Umeco's consolidated statement of operations for the three and nine months ended September 30, 2012, respectively).

The unaudited pro forma information does not include any adjustments for any restructuring activities, operating efficiencies or cost savings.

Acquisition of manufacturing assets of Star Orechem International Private Limited

On March 30, 2012, we acquired the manufacturing assets of Star Orechem International Private Limited (SOIL), in Nagpur, Central India, in a cash transaction for a total 1,848.2 Indian Rupees, or \$36.1 at the March 30, 2012 exchange rate. The amount is subject to normal and customary adjustments. The acquisition is expected to increase our global capacity for our Metal Extraction Product line of our In-Process Separation segment by approximately 25%, and provides the ability to further expand production at the site. We are in the process of upgrading the capabilities of the acquired plant to meet our operating standards. Our expectation is that this work and all necessary permits will be completed and we will begin production of our mining chemical products by mid-2013. The results of operations of the acquired business have been included in our In-Process Separation segment since April 1, 2012. The acquisition was funded from our existing cash on hand and has been accounted for as an acquisition of a business.

We have allocated the purchase price to the following separately identifiable assets acquired and liabilities assumed as of March 30, 2012:

<u>(In millions)</u>	
Inventories	\$ 1.1
Other current assets	0.4
Plants, equipment and facility	6.3
Identifiable intangibles	1.2
Goodwill	26.3
Other, net	0.8
Total purchase price	<u>\$36.1</u>

The goodwill recognized is largely attributable to the capacity and potential for future strategic growth. None of the goodwill recognized is expected to be deductible for income tax purposes. Approximately \$7.5 of the purchase price was withheld at closing, to be paid upon achievement of certain capacity expansion and other milestones, resulting in net cash paid in the first quarter of 2012 of \$28.6. As of September 30, 2012, none of the \$7.5 has been paid.

The amount allocated to intangibles represents the fair value of non-compete agreements, which were determined based on an independent appraisal. This fair value measurement is based on significant inputs not observable in the market and thus represents a Level 3 fair value measurement.

There were no material revenues or earnings related to SOIL included in our consolidated statement of income for the three and nine months ending September 30, 2012.

5. DISCONTINUED OPERATIONS AND OTHER DIVESTITURES

Discontinued operations

Coating Resins

In the second quarter of 2012, we committed to a plan to sell the assets and liabilities of our Coating Resins business. In conjunction with the plan, on May 11, 2012, we announced our agreement to sell our pressure sensitive adhesives ("PSA") product line of the Coating Resins segment to Henkel AG & Co. ("Henkel") for approximately \$105.0, including working capital of approximately \$15.0. As of June 30, 2012, we had met all the criteria for discontinued operations, and as a result, the results of operations of the former Coating Resins segment, including PSA, are reported as discontinued operations. The total assets and liabilities that are included as held-for-sale in our consolidated balance sheets as of September 30, 2012 are approximately \$1,498.3 and \$461.8, respectively, and exclude those related to the PSA product line, which were sold in July 2012, as noted below. The results of operations of the former Coating Resins segment are reported as discontinued operations, and are therefore excluded from both continuing operations and segment results for all periods presented. The results of the PSA product line are included in discontinued operations up through its sale on July 31, 2012. All previously reported financial information has been revised to conform to the current presentation.

[Table of Contents](#)

On July 31, 2012, we completed the sale of the PSA product line to Henkel under the terms noted above, subject to post-closing working capital adjustments. In August, we received cash consideration of \$112.8 from the sale. For both the three and nine months ended September 30, 2012, we recorded an after-tax gain on the sale of \$8.3, which is included in Net (loss) gain on sale of discontinued operations, net of tax in the consolidated statements of income.

On October 9, 2012, we entered into a definitive agreement to divest our remaining Coating Resins business to Advent International, a global private equity firm for \$1,032.0 plus assumed liabilities of \$118.0 bringing the total value to \$1,150.0. The sale is expected to close following the satisfaction of regulatory requirements and other customary closing conditions. As a result, we recorded an after-tax charge of \$23.8 in the third quarter of 2012 to adjust our carrying value of the disposal group to its fair value less cost to sell, based on the terms of the definitive agreement. The charge is included in Net (loss) gain on sale of discontinued operations, net of tax in the consolidated statements of income.

Building Block Chemicals

On February 28, 2011, we completed the sale of substantially all of the assets and certain liabilities of our former Building Block Chemicals segment (the "Business") to Cornerstone Chemical Company, an affiliate of HIG Capital, LLC (the "Purchaser"), pursuant to an Asset Purchase Agreement ("the Agreement") dated January 28, 2011, between the Company and the Purchaser. The total consideration received initially from the sale was \$175.7, including cash consideration of \$160.7 that we received at closing and a promissory note for \$15.0, due in six years and bearing interest at 7.0% annually. A cash payment of \$6.6 was made to the Purchaser in July 2011 as final settlement of the agreed working capital transferred, resulting in net realized consideration of \$169.1. The assets sold include our Fortier plant located in Westwego, Louisiana, personal property, inventory, accounts receivable, contract rights and certain other assets that are used in or relate to the Business, all as further specified in the Agreement. Liabilities assumed by the Purchaser include accounts payable, contract liabilities, and certain environmental and product liabilities, and certain other liabilities that relate to the Business and are as specified in the Agreement. Certain liabilities relating to the Business were retained by us, including certain environmental, pension and post-retirement healthcare liabilities. For the nine months ended September 30, 2011, we recorded an after-tax gain on the sale of \$34.6, which is included in Net (loss) gain on sale of discontinued operations, net of tax in the consolidated statements of income. The results of operations of the former Building Block Chemicals segment are reported as discontinued operations, and are therefore excluded from both continuing operations and segment results for all periods presented.

The following table displays summarized activity in our consolidated statements of income for discontinued operations during the three and nine months ended September 30, 2012 and 2011, related to our former Coatings Resins ("Coatings") and Building Block Chemicals ("BBC") segments.

	Three months ended September 30, 2012			Three months ended September 30, 2011		
	Coatings	BBC	Total	Coatings	BBC	Total
Net sales	\$ 364.3	\$ 0.0	\$ 364.3	\$ 415.0	\$ 0.0	\$ 415.0

Earnings from discontinued operations, net of tax	\$ 73.7	\$ 0.0	\$ 73.7	\$ 71.9	\$ 42.5	\$ 114.4

(1) Included in earnings of discontinued operations and income tax expenses for the three and nine months ending September 30, 2012 and 2011 were the following items:

	Three months ended September 30,		Nine months ended September 30,	
	2012	2011	2012	2011
Costs related to Coating Resins sale process	\$ 4.5	\$ —	\$ 19.7	\$ —
Net restructuring charges	0.6	8.8	0.3	20.2
Environmental liability increase	—	—	1.7	—
Total charges before taxes	\$ 5.1	\$ 8.8	\$ 21.7	\$ 20.2
Net tax benefit on above charges	(1.7)	(2.9)	(7.3)	(6.1)
Tax expense on estimated un-repatriated earnings from anticipated sale of Coating Resins	—	—	7.0	—
Total tax	(1.7)	(2.9)	(0.3)	(6.1)
Total expense impact on discontinued operations, net of tax	\$ 3.4	\$ 5.9	\$ 21.4	\$ 14.1

(2) The assets and liabilities of the Coating Resins segment were reclassified to held-for-sale effective June 30, 2012. Accordingly, depreciation and amortization were no longer recorded on these assets beginning July 1, 2012.

Assets and liabilities held for sale

The assets and liabilities of the former Coating Resins segment, including the PSA product line, are reported as assets and liabilities held for sale as of December 31, 2011. The PSA product line was divested during the third quarter of 2012. The following table displays a summary of the assets and liabilities held for sale as of September 30, 2012 and December 31, 2011.

	September 30, 2012	December 31, 2011
Assets		
Trade accounts receivable, net	\$ 234.1	\$ 212.4

[Table of Contents](#)

- (1) As of September 30, 2012 and December 31, 2011, the aggregate environmental related accruals included in liabilities held for sale were \$35.6 and \$32.9, respectively, of which \$3.1 and \$3.1 for each period, respectively, is included in accrued liabilities in the table above, with the remainder included in other liabilities.

Other divestitures

Bogota, Colombia manufacturing plant

During the first quarter of 2011, we sold a former manufacturing plant in Bogota, Colombia for which we recorded a net gain of \$3.3, which is recorded in Gain on sale of assets in the accompanying statements of income.

6. RESTRUCTURING OF OPERATIONS

In accordance with our accounting policy, restructuring costs are included in our corporate unallocated operating results for segment reporting purposes, which is consistent with management's view of its businesses. Aggregate pre-tax restructuring charges (credits) included in the consolidated statements of income were recorded by line item as follows:

	Three months ended		Nine months ended	
	September 30,		September 30,	
	2012	2011	2012	2011
Manufacturing cost of sales	\$ 0.8	\$ 0.2	\$ 3.1	\$ 0.8
Selling and technical services	0.3	—	0.8	—
Research and process development	—	—	0.5	—
Administrative and general	3.5	—	11.6	(0.1)
Total	\$ 4.6	\$ 0.2	\$ 16.0	\$ 0.7

Details of our 2012 restructuring initiatives are as follows:

In September 2012, we approved plans to realign the supporting structure of our Umeco segment as we take advantage of synergies from the acquisition. These plans resulted in a restructuring charge of \$3.7 related to the severance of 28 positions. The initiatives are expected to be substantially completed by first quarter of 2013.

In the second quarter of 2012, we launched initiatives in our corporate functions across sales, marketing, manufacturing, supply chain, research and development, and administrative functions to mitigate continuing costs following the anticipated sale of Coating Resins. These initiatives resulted in charges related to severance and employee benefits of \$11.6 in the second quarter and \$0.8 in the third quarter associated with the elimination of 174 positions. These initiatives are expected to be substantially completed and paid by the end of by 2014.

The remaining reserve relating to the 2012 restructuring initiatives at September 30, 2012 is \$14.5.

Details of our 2010 restructuring initiatives are as follows:

In May 2010, we approved plans to exit the production of certain phosphorus derivative products at our Mt. Pleasant, Tennessee facility. These plans resulted in a restructuring charge of \$5.5 in 2010, of which \$0.4 related to the severance of 10 positions, \$1.7 related to asset write-offs, and \$3.4 related to decommissioning activities, all of which related to our In-Process Separation segment. During 2011, we recorded an additional restructuring charge of \$1.1 related to these plans.

During the first nine months of 2012 we recorded a net favorable adjustment of \$0.2. All costs have been paid in full as of September 30, 2012.

Details of our 2009 restructuring initiatives are as follows:

In 2009, we initiated restructuring actions across all segments and corporate functions. These actions were taken in response to the downturn in the global economy, which especially impacted the automotive, construction and general industrial markets that we serve, and led to a significant reduction in our sales and operating profitability. The following summarizes the details of the restructuring initiatives launched in 2009, which resulted in \$13.6 of restructuring charges for the year ended December 31, 2009.

[Table of Contents](#)

In 2009, we launched restructuring initiatives at several of our In-Process Separation and Additive Technologies manufacturing locations, which resulted in restructuring charges totaling \$4.0. The manufacturing locations impacted by these initiatives included:

- Conversion of our manufacturing facility in Antofagasta, Chile into a blending and distribution facility to support the Mining business and elimination of manufacturing functions at the site.
- Closure of our manufacturing facility in Bogota, Colombia.

The above manufacturing restructuring initiatives included the elimination of 43 positions. During 2010 we recorded an additional restructuring charge of \$0.2.

We launched restructuring initiatives across our Engineered Materials segment in response to inventory destocking by parts manufacturers that supply large commercial aircraft manufacturers as well as a sharper than expected decline in business and regional jet production rates. These initiatives resulted in \$3.6 of restructuring expenses for severance and employee benefits related to the elimination of 230 positions; during 2010 we recorded a net favorable adjustment of \$0.4.

We launched several initiatives throughout 2009 in our In-Process Separation and Additive Technologies segments and corporate functions across sales, marketing, manufacturing, supply chain, research and development, and administrative functions, including our initiative to establish a shared services center. These initiatives resulted in \$6.0 of charges related to severance and employee benefits associated with the elimination of 208 positions; during 2010 we recorded net favorable adjustments of \$0.8. During 2011, we recorded net favorable adjustments of \$0.3 related to our 2009 restructuring initiatives.

In the third quarter of 2012, we recorded an additional restructuring charge of \$0.1. All of the aforementioned initiatives were substantially complete. The remaining reserve at September 30, 2012 of \$0.1 relating to 2009 restructuring initiatives is expected to be paid through 2014.

7. SHARE-BASED COMPENSATION

The fair value of each option or stock-settled share appreciation right (“SARS”) award is estimated on the grant date using a binomial-lattice option valuation model. Stock-settled SARS are economically valued the same as stock options. The binomial-lattice model takes into account variables such as volatility, dividend yield, and risk-free interest rate. In addition, the binomial-lattice model considers the contractual term of the option, the probability that the option will be exercised prior to the end of its contractual life, and the probability of termination or retirement of the option holder in computing the value of the option. The weighted average assumptions for the nine months ended September 30, 2012 and 2011 are noted in the following table:

<u>Nine months ended September 30,</u>	<u>2012</u>	<u>2011</u>
Expected life (years)	6.2	6.2
Expected volatility	41.86%	40.00%
Expected dividend yield	1.01%	1.04%
Risk-free interest rate	2.11%	3.36%
Weighted-average fair value per option	\$19.91	\$20.83

The expected life of options granted is derived from the output of the option valuation model and represents the period of time that options granted are expected to be outstanding. Expected volatilities are based on the combination of implied market volatility and our historical volatility. The risk-free rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of grant. As share-based compensation recognized in the consolidated statement of income is based on awards ultimately expected to vest, we incorporate the probability of pre-vesting forfeiture in determining the number of expected vested options. The forfeiture rate is based on the historical forfeiture experience and prospective actuarial analysis.

Stock Award and Incentive Plan

The 1993 Stock Award and Incentive Plan (the “1993 Plan”) provides for grants of a variety of awards, such as stock options (including incentive stock options and nonqualified stock options), non-vested stock (including performance stock), SARS (including those settled with common shares) and deferred stock awards and dividend equivalents. On April 19, 2012, our shareholders approved an amendment to the 1993 Plan to increase the shares issuable under the plan by 2,000,000. At September 30, 2012, there were approximately 6,200,000 shares reserved for issuance under the 1993 Plan, inclusive of 3,500,000 shares reserved for issuance for all outstanding share-based compensation grants.

Stock options and stock-settled SARS

We have utilized the stock option component of the 1993 Plan to provide for the granting of nonqualified stock options and stock-settled SARS with an exercise price at 100% of the market price on the date of the grant. Options and stock-settled SARS are generally exercisable in installments of one-third per year commencing one year after the grant date and annually thereafter, with contract lives of generally 10 years from the grant date.

A summary of stock options and stock-settled SARS activity for the nine months ended September 30, 2012 is presented below:

<u>Options and Stock-Settled SARS Activity:</u>	<u>Number of Units</u>	<u>Weighted Average Exercise Price Per Unit</u>	<u>Weighted Average Remaining Contractual Life (Years)</u>	<u>Aggregate Intrinsic Value</u>
Outstanding at January 1, 2012	3,305,399	\$ 42.71		
Granted	470,809	50.33		
Exercised	(719,150)	35.32		
Forfeited	(45,692)	46.38		
Outstanding at September 30, 2012	<u>3,011,366</u>	<u>\$45.62</u>	<u>5.8</u>	<u>\$ 59.9</u>
Exercisable at September 30, 2012	<u>2,163,442</u>	<u>\$ 44.50</u>	<u>4.7</u>	<u>\$ 45.5</u>

During the nine months ended September 30, 2012, we granted 470,809 stock options. The weighted-average grant-date fair value of the stock options granted during the nine months ended September 30, 2012 and 2011 was \$19.91 and \$20.83 per share, respectively. Total pre-tax compensation cost related to stock option and stock-settled SARS was \$1.7 and \$1.8 during the three months ended September 30, 2012 and 2011, respectively, and \$6.3 and \$5.5 during the nine months ended September 30, 2012 and 2011, respectively. The total intrinsic value of stock options and stock-settled SARS exercised during the nine months ended September 30,

[Table of Contents](#)

2012 and 2011 was \$17.6 and \$6.7, respectively. Treasury shares and newly issued shares have been utilized for stock option and stock-settled SARS exercises. The total fair value of stock options and stock-settled SARS vested during the nine months ended September 30, 2012 and 2011 was \$6.5 and \$6.8, respectively.

As of September 30, 2012, there was \$8.6 of total unrecognized compensation cost related to stock options and stock-settled SARS. That cost is expected to be recognized over a weighted-average period of 1.2 years as the majority of our awards vest over three years.

Total tax benefits realized from share-based awards was \$5.6 and \$2.3 for the nine months ended September 30, 2012 and 2011, respectively. Cash received from stock options exercised was \$19.7 and \$6.6 for the nine months ended September 30, 2012 and 2011, respectively.

Cash-settled SARS

Our 1993 Plan also provides for the granting of cash-settled SARS, which were granted during 2004 and 2005. Cash-settled SARS are liability-classified awards. Cash used to settle cash-settled SARS exercised during the nine months ended September 30, 2012 and 2011 was \$0.4 and \$0.1, respectively. The total amount of pre-tax expense (income) recognized for cash-settled SARS was \$1.0 and \$(1.6) for the nine months ended September 30, 2012 and 2011, respectively. The liability related to our cash-settled SARS was \$1.9 at September 30, 2012 and \$1.3 at December 31, 2011.

Non-vested stock, non-vested stock units and performance stock

The 1993 Plan provides for the issuance of non-vested stock, non-vested stock units and performance stock. Non-vested stock and stock units are subject to certain restrictions on ownership and transferability that lapse upon vesting. Performance stock payouts are based on the attainment of certain financial performance objectives and may vary depending on the degree to which the performance objectives are met. We did not grant any performance stock in 2012 and 2011, and there were no outstanding performance stock awards as of September 30, 2012.

A summary of non-vested stock and non-vested stock units for the nine months ended September 30, 2012 is presented below:

<u>Non-vested Stock and Stock Units:</u>	<u>Number of Units</u>	<u>Weighted Average Grant Date Fair Value Per Unit</u>
Nonvested at January 1, 2012	180,930	\$ 40.40
Granted	77,822	50.79
Vested	(38,745)	18.42
Forfeited	(5,225)	46.42
Nonvested at September 30, 2012	214,782	\$ 47.73

During the nine months ended September 30, 2012, we granted 67,139 non-vested stock units to employees and 10,683 shares of non-vested stock to nine directors, which generally vest on the third anniversary of the grant date. The weighted average fair value of the non-vested stock and non-vested stock units on the grant date was \$50.79 per share which was equal to the closing market price of our stock on the date of the grant. The total amount of share-based compensation expense recognized for non-vested stock and non-vested stock units was \$1.1 and \$0.7 for the three months ended September 30, 2012 and 2011, respectively, and \$3.2 and \$1.9 for the nine months ended September 30, 2012 and 2011, respectively. As of September 30, 2012, there was \$3.7 of total unrecognized compensation cost related to non-vested stock and stock units. That cost is expected to be recognized over a weighted-average period of 1.9 years.

Compensation cost related to all share-based compensation arrangements capitalized in inventory as of September 30, 2012 and December 31, 2011 was approximately \$0.5 and \$0.3, respectively.

As of September 30, 2012 and December 31, 2011, our additional paid-in capital pool ("APIC Pool"), which represents excess tax benefits available to absorb potential future tax deficiencies, was \$75.4 and \$71.7, respectively.

In the second quarter of 2012, in an effort to retain key employees of the Coatings Resins business who could be impacted by the potential sale of Coating Resins, we agreed that if any such individual's employment with Cytec is terminated as a result of a sale of Coating Resins, we would pay such employee an amount equal to the intrinsic value of any unvested options and restricted stock units based on the closing price of Cytec stock on the date of the sale. As of June 30, 2012, when we determined we had met all the criteria for discontinued operations, we determined that these certain unvested stock options and restricted stock units that had been accounted for as equity awards should be reclassified to be accounted for as liability awards. As a result, as of September 30, 2012,

[Table of Contents](#)

175,745 shares of options and 33,556 restricted stock units, which are included as outstanding in the above tables, are being accounted for as liability awards. Accordingly, we recorded a liability of \$4.6 for these awards by reclassifying \$1.7 of previously recognized expense out of additional paid in capital and recognized \$1.7 and \$2.9 of additional expense for the three and nine months ended September 30, 2012, respectively.

8. EARNINGS PER SHARE (EPS)

Basic earnings per common share excludes dilution and is computed by dividing net earnings available to common stockholders by the weighted-average number of common shares outstanding (which includes shares outstanding, less performance and non-vested shares for which vesting criteria have not been met) plus deferred stock awards, weighted for the period outstanding. Diluted earnings per common share is computed by dividing net earnings available to common stockholders by the sum of the weighted-average number of common shares outstanding for the period adjusted (i.e., increased) for all additional common shares that would have been outstanding if potentially dilutive common shares had been issued and any proceeds of the issuance had been used to repurchase common stock at the average market price during the period. Under this method, an increase in the fair market value of the Company's stock can result in a greater dilutive effect from potentially dilutive common shares. The proceeds are assumed to be the sum of the amount to be paid to the Company upon exercise of options, the amount of compensation cost attributed to future services and not yet recognized, and the amount of income taxes that would be credited to or deducted from capital upon exercise.

The following table sets forth the computation of basic and diluted earnings per common share for the three and nine months ended September 30, 2012 and 2011 (in thousands, except net earnings in millions and per share amounts):

	Three months ended September 30,		Nine months ended September 30,	
	2012	2011	2012	2011
Numerator:				
Earnings from continuing operations	\$ 31.0	\$ 25.4	\$ 69.9	\$ 54.0
Earnings from discontinued operations, net of tax	22.3	22.5	72.2	112.2
Net earnings attributable to Cytec Industries Inc.	<u>\$ 53.3</u>	<u>\$ 47.9</u>	<u>\$ 142.1</u>	<u>\$ 166.2</u>
Denominator:				
Weighted average shares outstanding	46,359	48,364	46,190	49,076
Effect of dilutive shares:				
Options and stock-settled SARS	669	380	599	507
Non-vested shares and units	125	90	127	83
Diluted average shares outstanding	<u>47,153</u>	<u>48,834</u>	<u>46,916</u>	<u>49,666</u>
Basic earnings per common share:				
Earnings from continuing operations	\$ 0.67	\$ 0.52	\$ 1.52	\$ 1.10
Earnings from discontinued operations	0.48	0.47	1.56	2.29
Net earnings per common share attributable to Cytec Industries Inc.	<u>\$ 1.15</u>	<u>\$ 0.99</u>	<u>\$ 3.08</u>	<u>\$ 3.39</u>
Diluted earnings per common share:				
Earnings from continuing operations	\$ 0.66	\$ 0.52	\$ 1.49	\$ 1.09
Earnings from discontinued operations	0.47	0.46	1.54	2.26
Net earnings per common share attributable to Cytec Industries Inc.	<u>\$ 1.13</u>	<u>\$ 0.98</u>	<u>\$ 3.03</u>	<u>\$ 3.35</u>

The following table sets forth the anti-dilutive shares/units excluded from the above calculation because their inclusion would have had an anti-dilutive effect on earnings per share (in thousands):

Nine months ended September 30,	2012	2011
Options	295	859
Stock-settled SARS	0	1,149
Non-vested shares/units	0	1
Total	<u>295</u>	<u>2,009</u>

[Table of Contents](#)

9. INVENTORIES

Inventories consisted of the following:

	September 30, 2012	December 31, 2011
Finished goods	\$ 188.8	\$ 121.9
Work in progress	9.8	6.8
Raw materials and supplies	86.1	57.8
Total inventories	<u>\$ 284.7</u>	<u>\$ 186.5</u>

10. DEBT

Long-term debt, including the current portion, consisted of the following:

	September 30, 2012		December 31, 2011	
	Face	Carrying Value	Face	Carrying Value
Five-Year Revolving Credit Line Due June 2016	\$ 25.0	\$ 25.0	\$ 0.0	\$ 0.0
4.6% Notes Due July 1, 2013	135.2	135.3	135.2	135.4
6.0% Notes Due October 1, 2015	249.6	249.3	250.0	249.8
8.95% Notes Due July 1, 2017	249.4	249.0	250.0	249.5
Other	8.0	8.0	1.2	1.2
Total debt	<u>\$ 667.2</u>	<u>\$ 666.6</u>	<u>\$ 636.4</u>	<u>\$ 635.9</u>
Less: current maturities	<u>(136.7)</u>	<u>(136.7)</u>	<u>0.0</u>	<u>0.0</u>
Long-term debt	<u>\$ 530.5</u>	<u>\$ 529.9</u>	<u>\$ 636.4</u>	<u>\$ 635.9</u>

All of the outstanding notes are unsecured and may be repaid in whole or in part, at our option at any time subject to a prepayment adjustment.

During the third quarter of 2012, we repurchased portions of our 6% notes due Oct 1, 2015 with a total carrying value of \$0.4 for a total purchase price of \$0.5 including accrued interest, resulting in a loss of less than \$0.1. Net loss from our debt repurchases is included in net loss on early extinguishment of debt in the accompanying statement of income.

During the second quarter of 2012, we repurchased portions of our 8.95% notes due July 1, 2017 with a total carrying value of \$0.6 for a total purchase price of \$0.8 including accrued interest, resulting in a loss of \$0.2. Net loss from our debt repurchases is included in net loss on early extinguishment of debt in the accompanying statement of income.

During the nine months ended September 30, 2011, we repurchased portions of our 4.6% notes due July 1, 2013 with a total carrying value \$5.5, for total purchase prices of \$5.8, including accrued interest, resulting in a loss of \$0.3. There were no debt repurchases for the three months ended September 30, 2011.

In the second quarter of 2012, we had a net draw down of \$170.0 from our Revolving Credit Facility for the purposes of funding the Umeco transaction, of which \$25.0 remained outstanding as of September 30, 2012. At September 30, 2012, \$375.0 was available for borrowing under the Revolving Credit Facility. We are required to comply with certain customary financial covenants under the facility: (i) the ratio of consolidated total debt to consolidated earnings before interest, taxes, depreciation and amortization ("EBITDA"), and (ii) the ratio of consolidated EBITDA to consolidated interest expense. We are in compliance with these covenants and expect to be in compliance for the foreseeable future.

At September 30, 2012 and December 31, 2011, the fair value of our debt was \$757.7 and \$715.4, respectively. The fair value of our debt is based on Level 2 inputs, as defined in Note 17. These inputs include a discounted cash flow analysis which incorporates the contractual terms of the notes and observable market-based inputs that include time value, interest rate curves, and credit spreads.

The weighted-average interest rate on all of our debt was 6.19% and 6.89%, as of September 30, 2012 and 2011, respectively. The weighted-average interest rate on short-term borrowings outstanding as of September 30, 2012 and 2011 was 0.78% and 0.78%, respectively.

11. ENVIRONMENTAL, CONTINGENCIES AND COMMITMENTS

Environmental Matters

We are subject to substantial costs arising out of environmental laws and regulations, which include obligations to remove or limit the effects on the environment of the disposal or release of certain wastes or substances at various sites or to pay compensation to others for doing so.

As of both September 30, 2012 and December 31, 2011, the aggregate environmental related accruals related to continuing operations was \$69.4 of which \$6.9 was included in accrued expenses, with the remainder included in other noncurrent liabilities. Environmental remediation spending for both the three months ended September 30, 2012 and 2011 was \$0.9, and for the nine months ended September 30, 2012 and 2011 was \$2.5 and \$2.6, respectively.

Our process is to review our environmental remediation accruals quarterly and based on new information, we may from time to time adjust our environmental related accruals. During the nine months ended September 30, 2012, based on additional information generated by site evaluations, we had a net increase in our environmental related accruals for continuing operations of \$1.5 related to several sites.

Our environmental related accruals can change substantially due to such factors as additional information on the nature or extent of contamination, methods of remediation required, changes in the apportionment of costs among responsible parties and other actions by governmental agencies, or private parties or if we are named in a new matter and determine that an accrual needs to be provided, or if we determine that we are not liable and no longer require an accrual.

The environmental accruals of our recent acquisition of Umeco have been included in the aggregate environmental related accruals related to continuing operations.

A further discussion of environmental matters can be found in Note 11 of the Notes to the Consolidated Financial Statements contained in our 2011 Annual Report on Form 10-K.

Other Contingencies

We are the subject of numerous lawsuits and claims incidental to the conduct of our or certain of our predecessors' businesses, including lawsuits and claims relating to product liability and personal injury, including asbestos, environmental, contractual, employment and intellectual property matters.

As of September 30, 2012 and December 31, 2011, the aggregate self-insured and insured contingent liability was \$49.0 and \$53.0, respectively, and the related insurance recovery receivable for the liability as well as claims for past payments was \$20.8 at September 30, 2012 and \$22.1 at December 31, 2011. The asbestos liability included in the above amounts at September 30, 2012 and December 31, 2011 was \$39.4 and \$42.4, respectively, and the insurance receivable related to the liability as well as claims for past payments was \$20.5 at September 30, 2012 and \$21.8 at December 31, 2011. We anticipate receiving a net tax benefit for payment of those claims for which full insurance recovery is not realized.

Asbestos

We, like many other industrial companies, have been named as one of hundreds of defendants in a number of lawsuits filed in the U.S. by persons alleging bodily injury from asbestos. The claimants allege exposure to asbestos at facilities that we own or formerly owned, or from products that we formerly manufactured for specialized applications. Most of these cases involve numerous defendants, sometimes as many as several hundred. Historically, most of the closed asbestos claims against us have been dismissed without any indemnity payment by us, however, we can make no assurances that this pattern will continue.

The following table presents information about the number of claimants involved in asbestos claims with us:

	Nine months ended <u>September 30, 2012</u>	Year ended December 31, <u>2011</u>
Number of claimants at beginning of period	8,000	8,000
Number of claimants associated with claims closed during period	(100)	(100)
Number of claimants associated with claims opened during period	100	100
Number of claimants at end of period	<u>8,000</u>	<u>8,000</u>

Numbers in the foregoing table are rounded to the nearest hundred and are based on information as received by us which may lag actual court filing dates by several months or more. Claims are recorded as closed when a claimant is dismissed or severed from a case. Claims are opened whenever a new claim is brought, including from a claimant previously dismissed or severed from another case.

[Table of Contents](#)

Our asbestos related contingent liabilities and related insurance receivables are based on an actuarial study performed by a third party, which is updated every three years. During the third quarter of 2012, we completed an actuarial study of our asbestos related contingent liabilities and related insurance receivables, which updated our last study prepared in the third quarter of 2009. The study is based on, among other things, the incidence and nature of historical claims data through June 30, 2012, the incidence of malignancy claims, the severity of indemnity payments for malignancy and non-malignancy claims, dismissal rates by claim type, estimated future claim frequency, settlement values and reserves, and expected average insurance recovery rates by claim type.

As a result of our findings, we recorded a decrease of \$2.1 to our self-insured and insured contingent liabilities for indemnity costs for pending and anticipated probable future claims and recorded a decrease of \$1.0 related to receivables for probable insurance recoveries for these pending and future claims. The reserve decrease is attributable to lower projected claim filings offset by more severe malignancy rates and settlement value projections. The decrease in the receivable is a result of the lower gross liability and a shift in the types of future claims expected. Overall, we expect to recover approximately 48% of our future indemnity costs. We have completed coverage in place agreements with most of our larger insurance carriers.

The ultimate liability and related insurance recovery for all pending and anticipated future claims cannot be determined with certainty due to the difficulty of forecasting the numerous variables that can affect the amount of the liability and insurance recovery. These variables include but are not limited to: (i) significant changes in the number of future claims; (ii) significant changes in the average cost of resolving claims; (iii) changes in the nature of claims received; (iv) changes in the laws applicable to these claims; and (v) financial viability of co-defendants and insurers.

Lead Pigment

Over the past 15 years we have been named as defendants in more than fifty cases in the U.S. in which plaintiffs assert claims for personal injury, property damage, and other claims for relief relating to one or more kinds of lead pigment that were used as an ingredient decades ago in architectural paint. Eight cases remain outstanding. The different suits were brought by government entities and/or individual plaintiffs, on behalf of themselves and others. The suits variously sought compensatory and punitive damages and/or injunctive relief, including funds for the cost of monitoring, detecting and removing lead based paint from buildings and for medical monitoring; for personal injuries allegedly caused by ingestion of lead based paint; and plaintiffs' attorneys' fees. We settled one of these cases in 2005 for an immaterial amount in order to avoid litigation costs. In all of the others, we prevailed in court or were dismissed as a defendant.

We currently are one of several defendants in eight personal injury lead ingestion cases, consisting of 172 plaintiffs venued in federal and state courts in Milwaukee, Wisconsin. One of the eight cases consists of 164 claimants, each alleging personal injury as a result of the ingestion of white lead carbonate in paint. The remaining seven cases consist of less than 10 total plaintiffs. We believe that the eight personal injury suits against us are without merit. The eight personal injury cases are currently stayed pending a decision by the United States Court of Appeals for the Seventh Circuit regarding whether the application of the risk contribution doctrine for lead ingestion cases in Wisconsin violates the defendants', including the Company's, constitutional rights.

In July 2005, in a case in which we were one of several defendants, the Supreme Court of Wisconsin held that Wisconsin's risk contribution doctrine applies to bodily injury cases against manufacturers of white lead pigment. Under this doctrine, manufacturers of white lead pigment may be liable for injuries caused by white lead pigment based on their past market shares, unless they can prove they are not responsible for the white lead pigment which caused the injury in question. Seven of the eight personal injury cases, including the personal injury case consisting of 164 plaintiffs, were filed before January 2011, when the Wisconsin legislature passed legislation that will make it substantially more difficult to bring lead suits in the future. In July 2009, the Wisconsin Supreme Court, in the case styled *Ruben Godoy et al v. E.I. DuPont de Nemours et al.*, upheld a lower court's decision dismissing the plaintiff's strict liability and negligent defect causes of action for white lead carbonate. The decision in this case, together with our non-existent or diminutive market share, reinforces our belief that we have no liability in any of the eight Wisconsin cases, and accordingly, we have not recorded a loss contingency.

Other

Periodically, we enter into settlement discussions for lawsuits or claims for which we have meritorious defenses and for which an unfavorable outcome against us is not probable. In such instances, no loss contingency is recorded since a loss is not probable and it is our policy to expense defense costs as incurred. Typically, we consider these types of settlements in fairly limited circumstances usually related to the avoidance of future defense costs and/or the elimination of any risk of an unfavorable outcome. Such settlements, if any, are recorded when it is probable a liability has been incurred, typically upon entering into a settlement agreement.

While it is not feasible to predict the outcome of all pending environmental matters, lawsuits and claims, it is reasonably possible that there will be a necessity for future provisions for costs for environmental matters and for other contingent liabilities that we believe, will not have a material adverse effect on our consolidated financial position, but could be material to our consolidated results of operations or cash flows in any one accounting period. We cannot estimate any additional amount of loss or range of loss in excess of the recorded amounts. Moreover, many of these liabilities are paid over an extended period, and the timing of such payments cannot be predicted with any certainty.

[Table of Contents](#)

From time to time, we are also included in legal proceedings as a plaintiff involving tax, contract, patent protection, environmental and other legal matters. Gain contingencies related to these matters, if any, are recorded when they are realized.

A further discussion of other contingencies can be found in Note 11 of Notes to Consolidated Financial Statements contained in our 2011 Annual Report on Form 10-K.

Commitments

We frequently enter into long-term contracts with customers with terms that vary depending on specific industry practices. Our business is not substantially dependent on any single contract or any series of related contracts. Descriptions of our significant sales contracts at December 31, 2011 are set forth in Note 11 of Notes to Consolidated Financial Statements contained in our 2011 Annual Report on Form 10-K.

12. COMPREHENSIVE INCOME (LOSS)

The components of comprehensive income (loss), which represents the change in equity from non-owner sources, for the three and nine months ended September 30, 2012 and 2011 are as follows:

	Three months ended September 30,		Nine months ended September 30,	
	2012	2011	2012	2011
Net earnings	\$ 53.8	\$ 48.5	\$ 143.6	\$ 168.4
Other comprehensive income (loss):				
Accumulated pension liability, net of tax	7.2	(3.7)	16.2	6.0
Unrealized gains (losses) on cash flow hedges, net of tax	—	(0.1)	—	0.4
Foreign currency translation adjustments	28.8	(85.8)	12.5	(16.8)
Comprehensive income (loss)	<u>\$ 89.8</u>	<u>\$ (41.1)</u>	<u>\$ 172.3</u>	<u>\$ 158.0</u>
Less: Comprehensive income attributable to noncontrolling interest	(0.6)	(0.6)	(1.3)	(2.2)
Comprehensive income (loss) attributable to Cytec Industries Inc.	<u>\$ 89.2</u>	<u>\$ (41.7)</u>	<u>\$ 171.0</u>	<u>\$ 155.8</u>

13. INCOME TAXES

The effective tax rate for continuing operations for the three and nine months ended September 30, 2012 was a tax provision of 13.9% (\$5.0) and 38.7% (\$44.2), respectively, compared to a tax provision of 34.0% (\$13.1) and 29.5% (\$22.6) for the three and nine months ended September 30, 2011. The effective tax rate for the three months ended September 30, 2012 was favorably impacted by a tax benefit of \$8.5 attributable to the reversal of certain tax reserves due to the settlement of U.S. tax audits for the years 2004 through 2008, and for the nine months ended September 30, 2012 was unfavorably impacted by net discrete tax expenses of \$14.5 attributable to management's intention to no longer permanently reinvest un-repatriated earnings of certain foreign subsidiaries. The effective tax rate for the three months ended September 30, 2011 was favorably impacted by a benefit of \$3.8 related to the resolution of a foreign tax examination. In addition to the \$3.8 benefit noted, the 2011 effective tax rate for the year to date period includes discrete net tax benefits of \$1.6 attributable to several tax jurisdictions.

As of September 30, 2012, the amount of gross unrecognized tax benefits for continuing operations is \$25.8 (excluding interest) of which \$22.3 would impact our effective tax rate, if recognized. The amount of gross unrecognized tax benefits at December 31, 2011 for continuing operations was \$26.3 (excluding interest) of which \$13.3 would impact our effective tax rate, if recognized.

We recognize interest and penalties related to unrecognized tax benefits in income tax expense in the consolidated statements of income. We had recorded a liability for the payment of interest and penalties (gross) for continuing operations, of approximately \$5.6 as of December 31, 2011, which decreased a net \$2.3 primarily due to the reduction in interest accruals regarding the settlement of U.S. tax audits, thus resulting in a liability for the payment of interest of \$3.3 as of September 30, 2012.

14. OTHER FINANCIAL INFORMATION

Dividends

On July 19, 2012, the Board of Directors declared a \$0.125 per common share cash dividend, payable on August 24, 2012 to shareholders of record as of August 10, 2012. Cash dividends paid in the third quarter of 2012 and 2011 were \$5.7 and \$6.1, respectively, and for the nine months ended September 30, 2012 and 2011 were \$20.2 and \$21.2, respectively. Dividends paid in the first nine months of 2012 and 2011 include \$3.0 and \$2.8, respectively, paid by a majority owned subsidiary to its minority shareholder. On October 18, 2012, the Board of Directors declared a \$0.125 per common share cash dividend, payable on November 26, 2012 to shareholders of record as of November 9, 2012.

Income taxes paid

Income taxes paid for the nine months ended September 30, 2012 and 2011 were \$70.8 and \$59.6, respectively.

Interest

Interest paid for the nine months ended September 30, 2012 and 2011 was \$35.8 and \$35.7, respectively. Interest income for the nine months ended September 30, 2012 and 2011 was \$3.0 and \$3.2, respectively.

Stock repurchases

In the first quarter of 2011, we repurchased 440,000 shares of our common stock at a total cost of \$23.8. In the second quarter of 2011 we repurchased 415,000 shares of our common stock at a total cost of \$23.0. In the third quarter of 2011 we repurchased 1,975,000 shares of our common stock at a total cost of \$83.8. There were no repurchases in the first nine months of 2012. Approximately \$197.9 remained authorized under our stock buyback program as of September 30, 2012. On October 9, 2012, our Board of Directors approved an additional \$452.0 of stock buyback authorization, bringing the total authorization to \$650.0.

15. SEGMENT INFORMATION

Segment changes

In the first quarter of 2012, we announced that we had retained an advisor to help us explore the potential separation of our Coating Resins segment, along with the pressure sensitive adhesives (“PSA”) product line and certain methyl acrylamide (“NMA”) product groups. In light of this potential separation, we realigned our segment reporting (internal and external) and management structure accordingly. PSA and NMA, which previously were included in our Engineered Materials and Additive Technologies segments, respectively, became part of our Coating Resins segment. Concurrently, to align the segments with our revised management structure and operating model, we also moved the formulated resins product line out of the Engineered Materials segment into the Additive Technologies segment. We believe our strategy, which realigned our reportable segments, will enable us to develop a more sustainable portfolio in the future that will drive earnings growth and a better return on our assets.

In July 2012, we completed the acquisition of Umeco plc, as further detailed in Note 4. The results of operations of Umeco are recorded as a separate segment. The Umeco segment includes composite and process materials, primarily for the aerospace and defense, wind energy, automotive, recreation and other industrial segments. The segment’s major product lines include high performance composites and process materials and solutions for the Aerospace, Automotive and Industrial markets. Its major high performance composite products consist of Aerospace-qualified prepregs and Industrial-grade prepregs that are applied to large commercial airliners, military aircraft, high performance automotive, defense, tooling, recreation, industrial and alternative energy. Umeco’s major process materials and solutions consists of vacuum bagging, release films and sealant tapes for the forming, infusion, and curing of composite structures. The net sales and earnings for the Umeco segment include only the activity since July 20, 2012, the date we completed the acquisition.

[Table of Contents](#)

As discussed in Note 5, the former Building Block Chemicals and Coating Resins segments are reported as discontinued operations for all periods presented. Summarized segment information for our four continuing segments for the three and nine months ended September 30 is as follows:

	Three months ended September 30,		Nine months ended September 30,	
	2012	2011	2012	2011
Net Sales:				
Engineered Materials	\$ 224.1	\$ 199.3	\$ 672.5	\$ 576.2
Umeco ⁽¹⁾	66.8	—	66.8	—
In Process Separation	98.1	89.7	289.9	250.0
Additive Technologies				
Sales to external customers	66.4	74.4	208.2	220.2
Intersegment sales	0.2	0.2	0.6	0.8
Net sales from segments	455.6	363.6	1,238.0	1,047.2
Elimination of intersegment revenue	(0.2)	(0.2)	(0.6)	(0.8)
Total consolidated net sales	<u>\$ 455.4</u>	<u>\$ 363.4</u>	<u>\$ 1,237.4</u>	<u>\$ 1,046.4</u>

	Three months ended September 30,				Nine months ended September 30,			
	2012	% of Sales	2011	% of Sales	2012	% of Sales	2011	% of Sales
Earnings from operations:								
Engineered Materials	\$ 40.5	18%	\$ 30.0	15%	\$ 124.1	18%	\$ 83.2	14%
Umeco ⁽¹⁾	(1.7)	-3%	—	—	(1.7)	-3%	—	—
In-Process Separation	24.4	25%	17.3	19%	74.4	26%	49.3	20%
Additive Technologies	9.6	14%	12.8	17%	29.8	14%	31.9	14%
Earnings from segments	72.8	16%	60.1	17%	226.6	18%	164.4	16%
Corporate and Unallocated, net ⁽²⁾	(29.4)		(14.3)		(86.9)		(55.2)	
Total earnings from operations	<u>\$ 43.4</u>	<u>10%</u>	<u>\$ 45.8</u>	<u>13%</u>	<u>\$ 139.7</u>	<u>11%</u>	<u>\$ 109.2</u>	<u>10%</u>

- (1) Umeco's net sales and operating losses reflect the period from its acquisition on July 20, 2012 through September 30, 2012. Operating losses include \$4.5 of expense of the Umeco inventory that was written up to fair value as of the acquisition date.
- (2) For the three and nine months ended September 30, 2012, corporate and unallocated includes restructuring charges of \$4.6 and \$16.0, respectively, for personnel reductions in the Umeco business and across corporate functions to mitigate continuing costs following the anticipated sale of Coating Resins, charges of \$4.3 and \$7.2 related to costs incurred for the acquisition of Umeco, and accelerated depreciation of \$0.7 and \$2.0, respectively, for the sale-leaseback of our Stamford facility treated as a financing transaction. For the three and nine months ended September 30, 2011, Corporate and Unallocated includes net pre-tax charges of \$0.2 and \$0.6, respectively, for restructuring charges, and a gain on the sale of assets of a certain Latin American subsidiary for \$3.3 for the nine months ended September 30, 2011. Corporate and unallocated also included costs previously allocated to the operations of our discontinued Coating Resins segment of \$15.7 and \$50.5 for the three and nine months ended September 30, 2012, and \$15.5 and \$50.1 for the three and nine months ended September 30, 2011. It also included costs previously allocated to the operations of our discontinued Building Block Chemicals segment of \$0.0 and \$1.0 for three and nine months ended September 30, 2011.

16. GOODWILL AND OTHER ACQUISITION INTANGIBLES

The following is the activity in the goodwill balances for each segment.

	Engineered Materials	In-Process Separation	Additive Technologies	Umeco	Total
Balance, December 31, 2011:					
Goodwill	\$ 234.0	\$ 52.7	\$ 27.8	\$ —	\$ 314.5
2012 Activity					
2012 Acquisitions	—	26.3	—	182.9	209.2
Currency exchange	(0.1)	1.1	—	3.6	4.6
	(0.1)	27.4	—	186.5	213.8
Balance, September 30, 2012:					
Goodwill	<u>\$ 233.9</u>	<u>\$ 80.1</u>	<u>\$ 27.8</u>	<u>\$ 186.5</u>	<u>\$ 528.3</u>

In conjunction with our segment realignment discussed in Note 15, we completed a goodwill impairment test in the first quarter of 2012 and concluded that there was no impairment.

[Table of Contents](#)

Other acquisition intangibles consisted of the following major classes:

	Weighted Average Useful Life (years)	Gross Carrying Value		Accumulated Amortization		Net Carrying Value	
		September 30, 2012	December 31, 2011	September 30, 2012	December 31, 2011	September 30, 2012	December 31, 2011
		2012		2012	2011	2012	2011
Technology-based	14.5	\$ 53.1	\$ 23.0	\$ (19.7)	\$ (17.7)	\$ 33.4	\$ 5.3
Marketing-related	9.9	16.3	5.0	(4.8)	(4.3)	11.5	0.7
Customer-related	15.8	165.9	18.9	(15.6)	(12.7)	150.3	6.2
Total		\$ 235.3	\$ 46.9	\$ (40.1)	\$ (34.7)	\$ 195.2	\$ 12.2

Amortization of acquisition intangibles for the three months ended September 30, 2012 and 2011 was \$3.4 and \$0.8, respectively, and for the nine months ended September 30, 2012 and 2011 was \$5.1 and \$2.4, respectively. As discussed in Note 4, we acquired \$183.4 of amortizable intangibles in the third quarter of 2012 related to our Umeco acquisition.

Assuming no change in the gross carrying amount of acquisition intangibles and the 2012 average currency exchange rates remain constant, the estimated future amortization expense for the next five years are as follows:

	2012	2013	2014	2015	2016	2017
Intangibles amortization expense	\$9.2	\$15.8	\$15.5	\$15.4	\$15.1	\$13.5

17. DERIVATIVE FINANCIAL INSTRUMENTS AND COMMODITY HEDGING ACTIVITIES

Foreign Currency Derivative and Hedging Activities

Currency Forward Contracts

We periodically enter into currency forward contracts primarily to hedge currency fluctuations of transactions denominated in currencies other than the functional currency of the respective entity. At September 30, 2012, the principal transactions hedged involved accounts receivable and accounts payable. When hedging currency exposures, our practice is to economically hedge such exposures with forward contracts denominated in the same currency and with similar critical terms as the underlying exposure, and therefore, the instruments are effective at generating offsetting changes in the fair value, cash flows or future earnings of the hedged item or transaction. The fair values of forward contracts are calculated each period. These forward contracts are not defined as hedging instruments and therefore, all changes in fair values are reported in other (expense) income, net.

At September 30, 2012, net contractual notional amounts of forward contracts outstanding translated into U.S. dollars ("USD") totals \$573.2. Of this total, \$419.8 was attributed to the exposure in forward selling/purchase of USD. The remaining \$153.4 was attributable to the exposure in forward selling/purchase of Euros, translated into USD equivalent amounts. The net unfavorable fair values of currency contracts, based on forward exchange rates at September 30, 2012 and December 31, 2011 were \$5.4 and \$2.4, respectively.

Cash Flow Hedges

In the fourth quarter of 2011, we entered into a contract for the construction of certain manufacturing equipment, the payments of which are denominated in Swiss francs (CHF), and totaled approximately 7.3 CHF. These CHF payments exposed us to exchange rate fluctuations between CHF and USD. To hedge this risk, we entered into forward contracts to buy CHF and sell USD at agreed upon rates. To protect our consolidated earnings against the risk of foreign currency-related fluctuation associated with the forecasted CHF payments for the equipment, we designated the currency forward to buy CHF and sell USD on the forward's maturity date (the "hedging instrument") as a cash flow hedge of the foreign currency risks associated with our capitalization of the first, previously unhedged, forecasted CHF-denominated invoices.

All of our forward contracts treated as a cash flow hedge were settled as of September 30, 2012, resulting in a net loss of approximately \$0.1. At December 31, 2011, the notional amount of the forward contracts designated as a cash flow hedge was approximately \$4.2, and the unrealized loss as of December 31, 2011 was approximately \$0.1. There was no hedge ineffectiveness for the contracts in 2012.

[Table of Contents](#)

Cross Currency Swaps

We have used cross currency swaps to hedge the changes in the cash flows of certain Euro denominated intercompany loans receivable (“Euro loans”) held by U.S. entities and to hedge a portion of our net investment in Cytec Surface Specialties SA/NV (our largest Euro functional currency subsidiary).

The swaps were originally designated as cash flow hedges of the changes in value of the future Euro interest and principal receipts that resulted from changes in the USD to Euro exchange rates on certain Euro denominated intercompany loans receivable we have with one of our subsidiaries. Since the loans and underlying investment were denominated in Euros, we had foreign exchange exposure to the Euro/USD exchange rate changes. We hedged these foreign exchange exposures by using cross currency swaps with notional amounts of €207.9 (\$250.0), which were expected to settle on October 1, 2015 (“ten year swaps”). At the initial principal exchange, we paid \$250.0 and received €207.9 from counterparties. At the final exchange of the ten year swaps, originally expected to be October 1, 2015, we were to pay €207.9 and receive \$250.0.

The swaps had fixed interest rates on both legs. We paid 4.52% interest per annum on the Euro notional amount and we received 6.0% interest per annum on the USD notional amount. The interest payment dates (April 1 and October 1) and Euro rates coincided with the Euro loans.

The swaps fixed the USD equivalent cash flows of the Euro loans and eliminated foreign exchange variability, since the notional amounts of the swaps equaled that of the loans, and all cash flow dates and interest rates coincided between the swaps and the loans; therefore no ineffectiveness was expected or occurred.

In September 2010, we de-designated our ten year swaps as hedging instruments due to the early settlement of a €41.6 portion of these swaps by one of our counterparties effective October 1, 2010. As a result of this termination, we executed a new cross currency swap effective October 1, 2010 to maintain the total notional amount of the ten year swaps at €207.9. With respect to this replacement swap, we paid 4.52% per annum on the Euro notional amount and received 5.80% per annum on the USD notional amount on each April 1 and October 1, through the maturity date of the swap, which was also expected to be on October 1, 2015. We concurrently designated all the ten year swaps as a net investment hedge of the value of one of our U.S. subsidiaries’ net investment in our Belgium-based subsidiary, Cytec Surface Specialties SA/NV, against the risk of adverse foreign exchange movements in the USD value of the Euro. Since the critical terms of the ten year swaps match the critical terms of the net investment in Cytec Surface Specialties SA/NV, the ten year swaps are highly effective in offsetting the changes in the value of the net investment attributable to the change in USD value of the Euro.

In July 2012, we terminated all of our outstanding cross currency swaps to take advantage of the declining value of the Euro and to prepare for the anticipated divestiture of Coating Resins. The final payment of approximately \$1.8 to settle the swaps was based on the fair value of the swaps at the time of termination.

All cross currency swaps were recorded at fair value as either assets or liabilities. Each period we recorded the change in the fair value of the ten year swaps in accumulated other comprehensive income. For the ten year swaps, prior to its de-designation as cash flow hedges in September 2010, we reclassified an amount out of accumulated other comprehensive income to the income statement to offset the foreign currency gain or loss on the remeasurement to USD of the Euro intercompany loans. The amount of such reclassification depended on changes in the USD/Euro exchange rate occurring during the period.

For cross currency swaps designated as a hedge of our net investment in Cytec Surface Specialties SA/NV, the fair value of the ten year swaps was calculated each period with changes in fair value reported in foreign currency translation adjustments within accumulated other comprehensive income (loss), net of tax. Such amounts reclassified to translation adjustments will remain in other comprehensive income (loss) until the complete or substantially complete liquidation of our investment in Cytec Surface Specialties SA/NV. We monitored the counterparty credit risk and the continued probability of the hedged cash flows as to amount and timing.

At December 31, 2011, the unfavorable fair value of the ten year cross currency swaps was \$13.2.

Commodity Derivative and Hedging Activities

We purchase natural gas for utility consumption at our manufacturing facilities and therefore, our overall profitability and operating cash flows are exposed to the variability in the market price. From time to time and through June 2011, as set forth in Note 6 of Notes to Consolidated Financial Statements contained in our 2011 Annual Report on Form 10-K, we have used natural gas forward purchase contracts to hedge a portion of our utility requirements at certain of our North American manufacturing facilities.

In conjunction with the divestiture of the former Building Block Chemicals segment in the first quarter of 2011, we terminated our natural gas hedge contracts and, since June 2011, we have not held any natural gas forwards.

At September 30, 2012, we did not have derivative instruments that contained credit-related-risk contingent features or provisions that would trigger immediate settlement or require us to post collateral to our counterparties. Also as of September 30, 2012, we did not have any significant concentration of credit risk arising from our derivative instruments.

[Table of Contents](#)

The following tables summarize the impact of derivative instruments on our consolidated balance sheets and consolidated statements of income:

	Asset Derivatives				Liability Derivatives			
	September 30, 2012		December 31, 2011		September 30, 2012		December 31, 2011	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Derivatives designated as hedging instruments:

Fair Value Measurements

We have certain assets and liabilities that are carried at fair value on a recurring basis in the financial statements, for which we determine the appropriate level in the fair value input hierarchy for each fair value measurement. The fair value hierarchy prioritizes the inputs, which refer broadly to assumptions market participants would use in pricing an asset or liability, into three levels. It gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The level in the fair value hierarchy within which a fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date. Level 2 inputs are inputs other than quoted prices within Level 1 that are observable for the asset or liability, either directly or indirectly, such as quoted prices for similar assets or liabilities in active markets, interest rates, exchange rates, and yield curves observable at commonly quoted intervals. Level 3 inputs are unobservable inputs for the asset or liability.

All of our derivatives are valued based on Level 2 inputs. Our currency forwards are valued based on readily available published indices for commodity prices and currency exchange rates. Our cross currency swaps are valued using an income approach based on industry-standard techniques. This model includes a discounted cash flow analysis that nets the discounted future cash receipts and the discounted expected cash payments resulting from the swap. The analysis is based on the contractual terms of the swaps including the period to maturity and observable market-based inputs that include time value, interest rate curves, foreign exchange rates, implied volatilities, as well as other relevant economic measures. We incorporate credit valuation adjustments to appropriately reflect both our own nonperformance risk and the counterparty's nonperformance risk in the fair value measurements.

Although we have determined that the majority of the inputs used to value our derivatives fall within Level 2 of the fair value hierarchy, the credit valuation adjustments associated with our derivatives utilize Level 3 inputs, such as estimates of current credit spreads, to evaluate the likelihood of default by us and our counterparties. However, as of September 30, 2012, we have determined that the credit valuation adjustments are not significant to the overall valuation of our derivatives. As a result, we have determined that our derivative valuations in their entirety are classified in Level 2 of the fair value hierarchy.

[Table of Contents](#)

A summary of the fair value measurements for each major category of derivatives at September 30, 2012 is outlined in the table below:

<u>Description</u>	<u>Significant Other Observable Inputs (Level 2)</u>
Currency forwards	\$ (5.4)
Total	<u>\$ (5.4)</u>

As of September 30, 2012, we did not have any non-financial assets and liabilities that are carried at fair value on a recurring basis in the consolidated financial statements or for which a fair value measurement was required for the nine months ended September 30, 2012. Included among our non-financial assets and liabilities that are not required to be measured at fair value on a recurring basis are plant, equipment and facilities, goodwill, acquisition intangibles, and asset retirement obligations. For more information regarding our hedging activities and derivative financial instruments, refer to Note 6 to the Consolidated Financial Statements contained in our 2011 Annual Report on Form 10-K.

18. EMPLOYEE BENEFIT PLANS

Net periodic cost for our pension and postretirement benefit plans was as follows:

<u>Three months ended September 30,</u>	<u>Pension Plans</u>		<u>Postretirement Plans</u>	
	<u>2012</u>	<u>2011</u>	<u>2012</u>	<u>2011</u>
Service cost	\$ 1.3	\$ 1.2	\$ 0.1	\$ 0.3
Interest cost	10.4	10.6	1.7	3.2
Expected return on plan assets	(12.0)	(11.8)	(0.6)	(0.8)
Net amortization	6.9	5.6	(0.8)	(1.0)
Net periodic cost	<u>\$ 6.6</u>	<u>\$ 5.6</u>	<u>\$ 0.4</u>	<u>\$ 1.7</u>

<u>Nine months ended September 30,</u>	<u>Pension Plans</u>		<u>Postretirement Plans</u>	
	<u>2012</u>	<u>2011</u>	<u>2012</u>	<u>2011</u>
Service cost	\$ 4.3	\$ 4.0	\$ 0.8	\$ 0.8
Interest cost	30.4	31.9	6.3	8.9
Expected return on plan assets	(36.2)	(36.0)	(1.6)	(2.2)
Net amortization	20.3	15.7	0.1	(4.4)
Curtailed gain ⁽¹⁾	—	0.1	—	(1.1)
Net periodic cost	<u>\$ 18.8</u>	<u>\$ 15.7</u>	<u>\$ 5.6</u>	<u>\$ 2.0</u>

The net periodic costs disclosed in the above table exclude the plans of subsidiaries primarily dedicated to the former Coating Resins segment, which are included in assets and liabilities held for sale on the consolidated balance sheets. Certain employees of our discontinued Coating Resins and Building Block Chemicals segments historically participated in our continuing plans. The amounts of the costs disclosed above charged to discontinued operations were approximately as follows:

<u>Three months ended September 30,</u>	<u>Pension Plans</u>		<u>Postretirement Plans</u>	
	<u>2012</u>	<u>2011</u>	<u>2012</u>	<u>2011</u>
Three months ended September 30,	\$ 1.0	\$ 0.8	\$ 0.1	\$ 0.3
Nine months ended September 30, ⁽¹⁾	\$ 2.8	\$ 2.8	\$ 0.8	\$ (0.6)

- (1) Nine months ended September 30, 2011 includes a pension curtailment charge of \$0.1 and a postretirement plan curtailment gain of \$1.1 resulting from the sale of our former Building Block Chemicals segment, which is included in Net (loss) gain on sale of discontinued operations, net of tax in the consolidated statements of income.

We disclosed in our 2011 Annual Report on Form 10-K that we expected to contribute \$40.7 and \$11.2, respectively, to our pension and postretirement plans in 2012. Expected contributions to our continuing plans were \$35.5 and \$11.2. Through September 30, 2012, actual contributions to our continuing pension and postretirement plans were \$26.8 and \$10.2, respectively.

[Table of Contents](#)

In September 2012, using updated demographic data, our actuaries revised the estimated funded status of our U.S. pension and postretirement plans as of January 1, 2012, as well as the related 2012 expenses. As a result, we recorded an increase of \$11.2 to our U.S. pension liabilities, with a corresponding decrease of \$7.0 in accumulated other comprehensive income and an adjustment to deferred taxes for \$4.2 to reflect the revised funded status. These adjustments increased the 2012 annual expense for these plans by approximately \$0.8. We also recorded a decrease of \$17.2 to our U.S. postretirement liability, with a corresponding increase of \$10.7 in accumulated other comprehensive income and an adjustment to deferred taxes for \$6.5 to reflect the revised funded status. These adjustments decreased the 2012 annual expense for the plan by approximately \$2.8.

In September 2011, using updated demographic data, our actuaries revised the estimated funded status of our U.S. pension and postretirement plans as of January 1, 2011, as well as the related 2011 expenses. As a result, we recorded a decrease of \$0.7 to our U.S. pension liabilities, with a corresponding increase of \$0.4 in accumulated other comprehensive income and an adjustment to deferred taxes for \$0.3 to reflect the revised funded status. These adjustments increased the 2011 annual expense for these plans by approximately \$0.8. We also recorded an increase of \$11.3 to our U.S. postretirement liability, with a corresponding decrease of \$7.0 in accumulated other comprehensive income and an adjustment to deferred taxes for \$4.3 to reflect the revised funded status. These adjustments increased the 2011 annual expense for the plan by approximately \$1.7.

We also sponsor various defined contribution retirement plans in the United States and a number of other countries, consisting primarily of savings and profit growth sharing plans. Contributions to the savings plans are based in part on matching a percentage of employees' contributions. Contributions to the profit growth sharing plans are generally based on our financial performance. Amounts expensed related to these plans, excluding plans of subsidiaries primarily dedicated to the discontinued Coating Resins segment, for the three months ended September 30, 2012 and 2011 were \$5.0 and \$4.8, respectively, and for the nine months ended September 30, 2012 and 2011 were \$17.3 and \$18.3, respectively. Certain employees of our discontinued Coating Resins and Building Block Chemicals segments historically participated in our continuing plans. Amounts included within these expenses that were charged to discontinued operations were approximately \$0.7 for both the three months ended September 30, 2012 and 2011, and \$2.3 and \$3.4 for the nine months ended September 30, 2012 and 2011, respectively.

19. SUBSEQUENT EVENTS

As discussed in Note 5, on October 9, 2012, we entered into a definitive agreement to divest our Coating Resins business to Advent International, a global private equity firm for \$1,032.0 plus assumed liabilities of \$118.0 bringing the total value to \$1,150.0. The sale is expected to close, following the satisfaction of regulatory requirements and other customary closing conditions.

As discussed in Note 14, on October 9, 2012, our Board of Directors approved an additional \$452.0 of stock buyback authorization, bringing the total authorization to \$650.0.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with the Consolidated Financial Statements and Notes to Consolidated Financial Statements. Currency amounts are in millions, except per share amounts. Percentages are approximate.

GENERAL

Overview

We are a global specialty chemicals and materials company focused on developing, manufacturing and selling value-added products. Our products serve a diverse range of end markets including aerospace and industrial materials, mining and plastics. Our strategy is to develop a robust, sustainable portfolio of businesses that provide sales and earnings growth, minimum operating margins of 10%, and a better return on assets by investing in and expanding our growth platforms while selectively monetizing or exiting non-strategic or under-performing businesses.

Sales price and volume by region and the impact of exchange rates on our reporting segments are important measures that are analyzed by management and are provided in our segment analysis. We report net sales in four geographic regions: North America, Latin America, Asia/Pacific and Europe/Middle East/Africa. The destination of the sale determines the region under which it is reported, which is consistent with management's view of the business. North America consists of the United States and Canada. Latin America includes Mexico, Central America, South America and the Caribbean Islands. Asia/Pacific is comprised of Asia, Australia and the islands of the South Pacific Rim.

Selling price changes and raw material cost changes year on year are an important factor in profitability especially in years of high volatility. Global oil and natural gas costs in certain countries are highly volatile and many of our raw materials are derived from these two commodities. Discussion of the year to year impact of raw materials and energy is provided in our segment discussion. Higher global demand levels and, occasionally, lack of adequate forecasting by customers, result in a lack of adequate capacity to meet the demand. In addition, occasional operating difficulties at suppliers have limited availability of certain of our raw materials.

Acquisition of Umeco plc

On July 20, 2012, we completed the acquisition of all of the outstanding shares of Umeco plc ('Umeco'), an international provider of composite and process materials, in an all-cash transaction at a cost of approximately \$423.8. Our consolidated financial results included in this MD&A include the results of the Umeco segment since July 20, 2012, the closing date of the acquisition of Umeco. Additionally, we have incurred costs of approximately \$7.2 related to the acquisition, which are reflected in our consolidated financial results for the nine months ended September 30, 2012. See Note 4, "Acquisitions", for further details.

With respect to our acquisition of Umeco, we filed a Current Report on Form 8-K on July 25, 2012, announcing the transaction. At that time, we expected to provide the financial statements and pro forma financial information required by items 9.01(a) and 9.01(b), respectively, on Form 8-K no later than 71 days from that date pursuant to Item 2.01 of Form 8-K. Upon analyzing the data after the acquisition, we determined that this transaction did not meet the threshold under the tests of significance and, as such, an amended Form 8-K was not required.

Discontinued operations

Coating Resins

In the second quarter of 2012, we committed to a plan to sell the assets and liabilities of our former Coating Resins segment. In conjunction with the plan, on May 11, 2012, we announced our agreement to sell our pressure sensitive adhesives ("PSA") product line of the Coating Resins segment to Henkel AG & Co. ("Henkel") for approximately \$105.0, including working capital of approximately \$15.0. As of June 30, 2012, we had met all the criteria for discontinued operations, and as a result, the results of operations of the former Coating Resins segment, including PSA, are now reported as discontinued operations. The total assets and liabilities that are held for sale as of September 30, 2012 are approximately \$1,498.3 and \$461.8, respectively, and exclude those related to the PSA product line, which were sold in July 2012, as noted below. The results of operations of the former Coating Resins segment are reported as discontinued operations, and are therefore excluded from both continuing operations and segment results for all periods presented. The results of the PSA product line are included in discontinued operations up through its sale on July 31, 2012. All previously reported financial information has been revised to conform to the current presentation.

On July 31, 2012, we completed the sale of the PSA product line to Henkel under the terms noted above, subject to post-closing working capital adjustments. In August, we received cash consideration of \$112.8 from the sale. For both the three and nine months ended September 30, 2012, we recorded an after-tax gain on the sale of \$8.3, which is included in Net (loss) gain on sale of discontinued operations, net of tax in the consolidated statements of income.

[Table of Contents](#)

On October 9, 2012, we entered into a definitive agreement to divest our remaining Coating Resins business to Advent International, a global private equity firm for \$1,032.0 plus assumed liabilities of \$118.0 bringing the total value to \$1,150.0. The sale is expected to close in the first quarter of 2013, following the satisfaction of regulatory requirements and other customary closing conditions. As a result, we recorded an after-tax charge of \$23.8 in the third quarter of 2012 to adjust our carrying value of the disposal group to its fair value less cost to sell, based on the terms of the definitive agreement. The charge is included in Net (loss) gain on sale of discontinued operations, net of tax in the consolidated statements of income.

Building Block Chemicals

On February 28, 2011, we completed the sale of substantially all of the assets and certain liabilities of our former Building Block Chemicals segment (the "Business") to Cornerstone Chemical Company, an affiliate of HIG Capital, LLC (the "Purchaser"), pursuant to an Asset Purchase Agreement ("the Agreement") dated January 28, 2011, between the Company and the Purchaser. The total consideration received from the sale was \$175.7, including cash consideration of \$160.7 that we received at closing and a promissory note for \$15.0. A cash payment of \$6.6 was made to the Purchaser in July 2011 as final settlement of the agreed upon working capital transferred, resulting in net realized consideration of \$169.1. Accordingly, the Business was treated as discontinued operations and discussion of that former segment is no longer included in the discussions that follow.

Segment realignment

We regularly review our segment reporting and classifications and may periodically change our reportable segments to align with operational changes. Our latest strategic review of our operations resulted in business segment changes that became effective January 1, 2012. In the first quarter of 2012, we announced that we had retained an advisor to help us explore the potential separation of our Coating Resins segment, along with the PSA product line and certain methyl acrylamide ("NMA") product groups. In light of this potential separation, we realigned our segment reporting (internal and external) and management structure accordingly. PSA and NMA, which previously were included in our Engineered Materials and Additive Technologies segments, respectively, became a part of the Coating Resins segment. Concurrently, to align the segments with our revised management structure and operating model, we moved the formulated resins business out of the Engineered Materials segment into the Additive Technologies segment. We believe our new strategy, which realigned our reportable segments, will enable us to develop a more sustainable portfolio in the future that will drive earnings growth and a better return on our assets.

As discussed in Note 5, the former Coating Resins and Building Block Chemicals segments are reported as discontinued operations for all periods presented. As discussed in Note 4, the acquired Umeco business is reported as a separate segment and includes results of operations since we acquired it on July 20, 2012. As a result, we now have four reportable business segments: Engineered Materials, Umeco, In-Process Separation and Additive Technologies. The Engineered Materials segment principally includes advanced composites, carbon fiber, and structural film adhesives. The Umeco segment includes composite and process materials, primarily for the aerospace and defense, wind energy, automotive, recreation and other industrial segments. The In-Process Separation segment includes mining chemicals and phosphines. The Additive Technologies segment includes polymer additives, specialty additives and formulated resins.

Quarter Ended September 30, 2012, Compared With Quarter Ended September 30, 2011

Consolidated Results

Net sales for the third quarter of 2012 were \$455.4 compared with \$363.4 for the third quarter of 2011. Overall, net sales increased 25% in 2012, of which 18% was attributable to sales from the newly acquired Umeco segment since July 20, 2012. Volume increases in the existing three segments improved sales by 5% and price increases increased sales by 3%. The changes in exchange rates negatively impacted net sales by 1%. Engineered Materials net sales increased by 12%, primarily due to increased volumes. In-Process Separation sales increased 9%, due mostly to higher selling prices and increased volumes. Additive Technologies net sales decreased 11%, due mostly to lower volumes and the impact of exchange rates.

For a detailed discussion on revenues refer to the Segment Results section below.

Manufacturing cost of sales was \$320.8, or 70.5%, of net sales in the third quarter of 2012, compared with \$256.0, or 70.5%, of net sales in the third quarter of 2011. Total manufacturing costs increased by \$64.8, due mostly to costs of sales of \$55.1 related to the Umeco segment, which includes \$4.5 for the expense of inventory that was written up to fair value at the acquisition. The increase was also due to higher period costs of \$13.8, mostly due to supporting the increased manufacturing levels resulting from the growth of the Engineered Materials and In-Process Separation segments. We also had \$4.2 of higher costs from higher sales volumes in the Engineered Materials and In-Process Separation segments, freight charges increased by \$1.0, and restructuring costs increased \$0.6 year over year. These higher costs of sales were partially offset by the favorable impact of foreign exchange rate changes of \$5.1, favorable fixed cost absorption of \$4.5, and lower raw material costs of \$0.4.

[Table of Contents](#)

Selling and technical services expenses were \$36.5 in the third quarter of 2012 versus \$29.3 in the third quarter of 2011. Research and process development expenses were \$13.4 versus \$10.9 in the prior year. Administrative and general expenses were \$37.9 versus \$20.6 in the prior year. Overall operating expenses increased \$27.0, from \$60.8 in 2011 to \$87.8 in the third quarter of 2012, primarily due to \$10.8 of operating charges related to personnel and other operating expenses we incurred for the new Umeco segment. They also increased \$5.0 for increased personnel to support our growth businesses, higher costs of \$4.3 for professional fees and other costs we incurred in our effort to acquire Umeco, \$4.1 of higher incentive compensation costs, higher restructuring charges of \$3.8 mostly to realign the supporting structure of our Umeco segment to take advantage of synergies from the acquisition, and \$0.7 of accelerated depreciation related to the sale-leaseback of our Stamford research laboratory treated as a financing transaction. These increases were partially offset by a favorable impact from changes in exchange rates of \$2.0.

Amortization of acquisition intangibles was \$3.4 and \$0.8 in the third quarter of 2012 and 2011, respectively. The increase is due to the amortization of intangible assets acquired from the Umeco acquisition in the third quarter.

Other (expense) income, net was an expense of \$0.3 in the third quarter of 2012 compared to income of \$1.3 in the third quarter of 2011. The third quarter of 2012 includes a \$1.1 expense for a foreign exchange loss on an acquired Umeco intercompany loan that was settled during the quarter.

Interest expense, net was \$7.0 in the third quarter of 2012 compared with \$8.6 in the prior year. The decrease of \$1.6 is primarily due to higher capitalized interest of \$2.5 due to the restart of the carbon fiber expansion project in 2012, which was offset by lower interest income of \$0.5 and higher interest expense of \$0.4, mostly related to the partial drawdown of the Revolving Credit Facility in the third quarter of 2012.

The effective tax rate for continuing operations for the three months ended September 30, 2012 was a tax provision of 13.9% (\$5.0) compared to 34.0% (\$13.1) for the three months ended September 30, 2011. For the three months ended September 30, 2012, the rate was favorably impacted by a tax benefit of \$8.5 attributable to the reversal of certain tax reserves due to the completed U.S. tax audits for the years ended 2004 through 2008.

Net earnings from continuing operations for the third quarter of 2012 was \$31.0 (\$0.66 per diluted share), an increase of \$5.6 from \$25.4 (\$0.52 per diluted share) reported for the same period in 2011. Included in the third quarter of 2012 were charges of \$4.3 (\$0.09 per diluted share) related to costs incurred for the acquisition of Umeco, after-tax restructuring charges of \$3.3 (\$0.07 per diluted share) primarily related to plans to realign the supporting structure of our Umeco segment as we take advantage of synergies from the acquisition, after-tax charges of \$3.1 (\$0.7 per diluted share) related to the third quarter expense of Umeco inventory that was written up to fair value as of the acquisition date, foreign exchange losses of \$0.7 after-tax (\$0.01 per diluted share) for the settlement of an intercompany loan we acquired in the Umeco transaction, and accelerated depreciation of \$0.4 after tax (\$0.01 per diluted share) for the sale-leaseback of our Stamford facility treated as a financing transaction. Also included in the third quarter of 2012 is a tax benefit of \$8.5 (\$0.18 per diluted share) attributable to the reversal of certain tax reserves due the completed U.S. tax audits for the years ended 2004 through 2008. Included in the third quarter of 2011 was \$0.1 of after-tax restructuring costs. For the three months ending September 30, 2012 and 2011, net earnings from continuing operations included pre-tax costs previously allocated to the operations of our discontinued Coating Resins segment of \$15.7 and \$15.5, respectively.

Earnings from discontinued operations, net of tax, were \$22.8 in the third quarter of 2012 compared with \$23.1 in 2011. The earnings from discontinued operations, net of tax for 2012 reflect the following after-tax amounts: the earnings from operations of our former Coatings segment of \$38.3, the realized gain of \$8.3 on the sale of our PSA product line in the third quarter, which is part of the former Coatings segment, and a charge of \$23.8 to adjust to the carrying value of the assets held for sale at September 30, 2012 to their fair value less costs to sell. This charge was based on new information received about the carrying value as determined by our agreement to sell remaining Coatings segment that we entered into in October 2012. In the third quarter of 2012, discontinued operations of our former Coatings segment included the following after-tax items: costs of \$3.0 related to the sale of Coating Resins and restructuring charges of \$0.4. For the third quarter of 2011, discontinued operations, net of tax included after-tax net restructuring charges of \$5.9.

Net earnings for the third quarter of 2012 were \$53.3 (\$1.13 per diluted share), an increase of \$5.4 from the net earnings of \$47.9 (\$0.98 per diluted share) in the same period in 2011.

Segment Results

Year-to-year comparisons and analyses of changes in net sales by segment and region during the quarter are set forth below.

Engineered Materials

	2012	2011	Total % Change	% Change Due to		
				Price	Volume/Mix	Currency
North America	\$ 138.6	\$ 133.5	4%	3%	1%	0%
Latin America (1)	1.0	0.8	—	—	—	—
Asia/Pacific	14.4	10.2	41%	3%	38%	0%
Europe/Middle East/Africa	70.1	54.8	28%	5%	23%	0%
Total	\$ 224.1	\$ 199.3	12%	3%	9%	0%

(1) Due to the low level of sales in this geographic region, percentage comparisons are not meaningful.

[Table of Contents](#)

Net sales increased 12% primarily due to a 9% increase in selling volumes. The higher selling volumes in the third quarter of 2012 were primarily attributable to the continued ramp up of new large commercial transport programs and increased build rates of existing large commercial transport models. In addition, we also experienced higher sales volumes as a result of build rate increases in the civil rotorcraft and certain segments within the business jet market. Selling prices increased 3% and changes in exchange rates did not significantly impact net sales.

Earnings from operations were \$40.5 or 18% of sales in 2012, compared with \$30.0, or 15% of sales in 2011. The \$10.5 increase in earnings was generated by increased marginal income due to higher selling volumes of \$11.0, increased selling prices of \$6.7, the favorable impact of foreign exchange rate changes of \$2.8, increased fixed cost absorption of \$1.4 due to increased production volume, and \$0.9 of lower costs primarily driven by raw materials. These positive impacts to earnings were partially offset by higher manufacturing and freight costs of \$10.0 mostly due to increased spending to meet increased production demands, and \$2.3 of higher operating expenses, which include continued investments in technology in support of new growth programs, wage inflation and increased benefit costs.

Umeco (from July 20, 2012 through September 30, 2012)

	2012	2011	Total % Change ⁽¹⁾	% Change Due to ⁽¹⁾		
				Price	Volume/Mix	Currency
North America	\$ 22.6	\$ 0.0	—	—	—	—
Latin America	4.9	0.0	—	—	—	—
Asia/Pacific	3.1	0.0	—	—	—	—
Europe/Middle East/Africa	36.2	0.0	—	—	—	—
Total	\$66.8	\$0.0	—	—	—	—

(1) Sales prior to July 20, 2012 were not attributable to Cytec. Therefore, percentage comparisons are not meaningful.

Net sales for the quarter represent net sales by Umeco for the period from July 20, 2012 through September 30, 2012.

The losses from operations were \$1.7 or (3%) of sales in 2012. As a result of purchase accounting for the acquisition of Umeco, we wrote up our inventory to fair value by \$4.5 and subsequently charged the write up to cost of sales as the inventory was sold in the third quarter.

In-Process Separation

	2012	2011	Total % Change	% Change Due to		
				Price	Volume/Mix	Currency
North America	\$26.2	\$21.9	20%	7%	13%	0%
Latin America	28.2	26.8	5%	3%	2%	0%
Asia/Pacific	23.2	22.5	3%	1%	2%	0%
Europe/Middle East/Africa	20.5	18.5	11%	10%	2%	-1%
Total	\$98.1	\$89.7	9%	5%	4%	0%

Net sales were up 9%, primarily due to higher selling prices of 5% and higher volumes of 4%. The volume increase reflects strong demand for mining products in the copper market, new mine fills of \$3.4 and for phosphine gases and derivative products. Selling prices increased across most product lines.

Earnings from operations were \$24.4 or 25% of sales in 2012, compared with \$17.3, or 19% of sales in 2011. The \$7.1 increase in earnings is principally due to increased marginal income from higher selling volumes of \$4.6, price increases of \$4.5, net favorable fixed cost absorption of \$2.1 on higher production levels, and a favorable impact from changes in exchange rates of \$1.1. This increase in earnings was partially offset by higher freight, warehousing and manufacturing costs of \$2.5 due to the higher volumes, increased operating costs of \$2.4 to support our accelerated growth strategy, and higher raw material costs of \$0.3.

Additive Technologies

	2012	2011	Total % Change	% Change Due to		
				Price	Volume/Mix	Currency
North America	\$29.5	\$ 32.2	-9%	3%	-12%	0%
Latin America	5.3	5.5	-3%	11%	-4%	-10%
Asia/Pacific	16.8	16.8	0%	-3%	3%	0%
Europe/Middle East/Africa	14.8	19.9	-26%	-1%	-16%	-9%
Total	\$ 66.4	\$ 74.4	-11%	1%	-9%	-3%

Net sales decreased 11% primarily due to lower volumes of 9% and the impact of changes in exchange rates which reduced sales by 3%. Higher sales prices increased sales by 1%. Selling volumes decreased across all product lines, due mostly to weak demand from the industrial markets in Europe and North America.

Earnings from operations were \$9.6 or 14% of sales in 2012, compared with \$12.8 or 17% of sales in 2011. The \$3.2 decrease in earnings is due primarily from decreased marginal income due to lower selling volumes of \$3.9, higher period of costs of \$0.8 from higher manufacturing and benefit costs, increased commercial and administration expenses of \$0.4 due to wage inflation and increased benefit costs, and higher raw material costs of \$0.2. These were partially offset by lower freight costs on lower volumes, increased fixed cost absorption of \$1.1 and sales price increases of \$1.0. The overall foreign exchange impact for the quarter was minimal as unfavorable sales exchange was offset by favorable impacts on raw materials and other costs.

Nine Months Ended September 30, 2012, Compared With Nine Months Ended September 30, 2011**Consolidated Results**

Net sales for the first nine months of 2012 were \$1,237.4 compared with \$1,046.4 for the first nine months of 2011. Overall, net sales increased 18%, which was primarily due to volume increases of 8% attributable to continued growth in our Engineered Materials and In-Process Separation segments. Net sales also increased 6% due to sales recorded from the newly acquired Umeco segment, which includes revenues since we acquired it on July 20, 2012, and price increases of 5%. Changes in exchange rates negatively impacted net sales by 1%. Engineered Materials net sales increased by 17%, due to increased volumes of 13% and price increases of 4%. In-Process Separation sales increased 16%, due to increased volumes of 9% and higher selling prices of 7%. Additive Technologies net sales decreased 5% due to lower volumes and the impact of exchange rate changes, which were partially offset by price increases.

For a detailed discussion on revenues refer to the Segment Results section below.

Manufacturing cost of sales was \$847.3, or 68.5%, of net sales in the first nine months of 2012, compared with \$739.4, or 70.7%, of net sales in the first nine months of 2011. Total manufacturing costs increased by \$107.9 due mostly to the addition of costs of sales related to Umeco of \$55.1, which includes \$4.5 for the expense of inventory that had been written up to fair value at the acquisition date. Also, we incurred \$39.3 of higher period costs, \$28.9 of higher variable costs from increased volumes in the Engineered Materials and In-Process Separation segments, higher raw materials costs of \$4.3, and higher freight of \$2.6. Restructuring charges were higher by \$2.3 in the first nine months of 2012, primarily related to mitigation of continuing costs following the future separation of Coating Resins and plans to realign the supporting structure of our Umeco segment as we take advantage of synergies from the acquisition. These increases in manufacturing costs of sales were partially offset by the impact of foreign exchange rate changes, which decreased costs by \$12.9, and favorable fixed cost absorption of \$11.7.

Selling and technical services expenses were \$105.0 in the first nine months of 2012 versus \$93.8 in the first nine months of 2011. Research and process development expenses were \$39.5 versus \$32.9 in the prior year. Administrative and general expenses were \$100.8 versus \$72.0 in the prior year. Overall operating expenses increased \$46.6, from \$198.6 in 2011 to \$245.2 in the first nine months of 2012, primarily due to higher restructuring costs of \$13.0 in 2012 related to our effort to mitigate continuing costs following the future separation of Coating Resins and plans to realign the supporting structure of our Umeco segment as we take advantage of synergies from the acquisition, as well as operating expenses for the new Umeco segment of \$10.9. We also experienced higher costs of approximately \$18.1 to support increased demand in our Engineered Materials and In-Process Separation businesses, \$7.2 of costs related to the acquisition of Umeco prior to the acquisition date, and \$2.0 for accelerated depreciation related to the sale-leaseback of our Stamford research labs treated as a financing transaction. These increases were offset by a favorable impact from changes in exchange rates of \$4.6.

Amortization of acquisition intangibles was \$5.1 and \$2.4 in the first nine months of 2012 and 2011, respectively. The increase is due to the amortization of intangible assets acquired from the Umeco acquisition completed on July 20, 2012.

[Table of Contents](#)

In the first nine months of 2011 we completed the sale of a former manufacturing site in Bogota, Colombia and recorded a \$3.3 gain on sale of assets.

Other income (expense), net was a net expense of \$1.3 in the first nine months of 2012 compared with \$4.9 in the first nine months of 2011. The first nine months of 2012 includes a \$1.1 expense for a foreign exchange loss on an acquired Umeco intercompany loan that was settled during the third quarter. In the first nine months of 2011, other income (expense), net includes net environmental charges of \$4.4, primarily related to increases in environmental liabilities at two specific inactive sites with new remedial design requirements.

For the nine months ended September 30, 2012 and 2011, we recorded losses on early extinguishment of debt of \$0.2 and \$0.3, respectively.

Interest expense, net was \$24.0 in the first nine months of 2012 compared with \$27.4 in the prior year. The decrease of \$3.4 is primarily due to higher capitalized interest of \$4.4 due to the restart of the carbon fiber expansion project in 2012, partially offset by higher interest expense of \$0.9, mostly on the partial drawdown of the Revolving Credit Facility in the second quarter of 2012, and lower interest income of \$0.3.

The effective tax rate for continuing operations for the nine months ended September 30, 2012 was a tax provision of 38.7% (\$44.2) compared to 29.5% (\$22.6) for the nine months ended September 30, 2011. For the nine months ended September 30, 2012, the rate was favorably impacted by a tax benefit of \$8.5 attributable to the reversal of certain tax reserves due to the completed U.S. tax audits for the years ended 2004 through 2008, and was unfavorably impacted by net discrete tax expenses of \$14.5 attributable to management's intention to no longer permanently reinvest un-repatriated earnings of certain foreign subsidiaries.

Net earnings from continuing operations for the first nine months of 2012 was \$69.9 (\$1.49 per diluted share), an increase of \$15.9 from \$54.0 (\$1.09 per diluted share) reported for the same period in 2011. Included in continuing operations for the first nine months of 2012 were after-tax restructuring charges of \$11.0 (\$0.24 per diluted share) across corporate functions to mitigate continuing costs following the anticipated sale of Coating Resins and personnel reductions in the acquired Umeco business, charges of \$7.2 (\$0.15 per diluted share) related to costs incurred for the acquisition of Umeco, an after-tax foreign exchange loss of \$0.7 (\$0.01 per diluted share) on the settlement of an acquired intercompany loan from the Umeco transaction, and accelerated depreciation of \$1.3 after-tax (\$0.03 per diluted share) for the sale-leaseback of our Stamford facility treated as a financing transaction. Also included in the first nine months of 2012 is a tax benefit of \$8.5 (\$0.18 per diluted share) attributable to the reversal of certain tax reserves due to the completed U.S. tax audits for the years ended 2004 through 2008, and an income tax provision of \$14.5 (\$0.31 per diluted share) related to the establishment of a liability for un-repatriated earnings of foreign subsidiaries, which we can no longer consider permanently reinvested in those entities, due to the anticipated sale of Coating Resins. Included in continuing operations for the first nine months of 2011 was \$0.3 of after-tax restructuring costs, after-tax charges of \$2.7 for the increase to environmental accruals at an inactive site in the U.S. for updated estimated remediation costs, and the after-tax gain of \$2.1 on the sale of the former manufacturing site in Bogota, Colombia. For the nine months ending September 30, 2012 and 2011, net earnings from continuing operations included pre-tax charges previously allocated to the operations of our discontinued Coating Resins segment of \$50.5 and \$50.1, respectively, and \$1.0 for the nine months ended September 30, 2011 for costs previously allocated to the operations of our former Building Block Chemicals segment.

Earnings from discontinued operations, net of tax, were \$73.7 for the first nine months of 2012 compared to \$114.4 for the comparable period in 2011. The earnings from discontinued operations, net of tax for 2012 reflect the following after-tax amounts: the earnings from operations of our former Coatings segment of \$89.2, the realized gain of \$8.3 on the sale of our PSA product line in the third quarter, which is part of the former Coatings segment, and a charge of \$23.8 to adjust to the carrying value of the assets held for sale at September 30, 2012 to its fair value less costs to sell. This charge was based on new information received about the carrying value as determined by our agreement to sell the remaining portion of our former Coatings segment that we entered into in October 2012. For the first nine months of 2012, earnings from operations of our former Coatings segment included the following after-tax items: charges of \$12.8 related to costs associated with the sale of Coating Resins, \$7.0 of income tax expense related to the requirement of establishing a tax liability on a portion of the un-repatriated earnings of certain foreign subsidiaries to be sold as part of the sale of Coating Resins, a charge of \$1.2 related to an increase in the environmental liability at a certain site for new remedial design requirements, and \$0.4 of restructuring charges. The 2011 earnings reflect the results of our former Coating Resins segment and our former Building Block Chemicals segment, prior to its sale in the first quarter of 2011. The results in the nine months ended September 30, 2011 also include the net after-tax gain of \$34.6 resulting from the completion of the sale of our former Building Block Chemicals segment in the first quarter of 2011.

Net earnings for the nine months ended September 30, 2012 was \$142.1 (\$3.03 per diluted share), which is a \$24.1 decrease from the net earnings of \$166.2 (\$3.35 per diluted share) in the same period in 2011.

Segment Results

Year-to-year comparisons and analyses of changes in net sales by segment and region are set forth below.

[Table of Contents](#)

Engineered Materials

	2012	2011	Total % Change	% Change Due to		
				Price	Volume/Mix	Currency
North America	\$ 416.6	\$ 375.7	11%	3%	8%	0%
Latin America (1)	3.3	2.5	—	—	—	—
Asia/Pacific	44.1	28.9	53%	4%	49%	0%
Europe/Middle East/Africa	208.5	169.1	23%	5%	18%	0%
Total	\$672.5	\$576.2	17%	4%	13%	0%

(1) Due to the low level of sales in this geographic region, percentage comparisons are not meaningful.

Net sales increased 17%, primarily due to increased selling volumes of 13%. The higher selling volumes for the nine months ended September 30, 2012 were primarily attributable to the continued ramp up of new large commercial transport programs and increased build rates of existing large commercial transport models. In addition, we also experienced higher sales volumes as a result of build rate increases across the military, civil rotorcraft and certain segments within the business jet market. Selling prices increased 4% and changes in exchange rates did not significantly impact net sales.

Earnings from operations were \$124.1 or 18% of sales in 2012, compared with \$83.2, or 14% of sales in 2011. The \$40.9 increase in earnings was generated by increased marginal income due to higher selling volumes of \$45.6, increased selling prices of \$20.3, increased fixed cost absorption of \$8.9 due to increased production volumes, and \$6.9 due to the favorable impact of foreign exchange rates. These positive impacts to earnings were partially offset by higher manufacturing and freight costs of \$32.2 due to increased spending to meet increased production demands, and \$7.8 of higher operating expenses due to continued investments in technology in support of new growth programs, wage inflation, increased benefit costs, and a bad debt provision of \$0.8, and \$0.8 of cost inflation inclusive of cost reductions related to manufacturing waste and raw material costs.

Umeco (from July 20, 2012 through September 30, 2012)

	2012	2011	Total % Change (1)	% Change Due to (1)		
				Price	Volume/Mix	Currency
North America	\$ 22.6	\$ 0.0	—	—	—	—
Latin America	4.9	0.0	—	—	—	—
Asia/Pacific	3.1	0.0	—	—	—	—
Europe/Middle East/Africa	36.2	0.0	—	—	—	—
Total	\$66.8	\$0.0	—	—	—	—

(1) Sales prior to our acquisition of Umeco on July 20, 2012 were not attributable to Cytec. Therefore, percentage comparisons are not meaningful.

Net sales for the nine months ended September 30, 2012 represent net sales by Umeco for the period from July 20, 2012 through September 30, 2012.

The losses from operations were \$1.7 or (3%) of sales in 2012. As a result of purchase accounting for the acquisition of Umeco, we wrote up our inventory to fair value by \$4.5 and subsequently charged the write up to cost of sales as the inventory was sold in the third quarter.

In-Process Separation

	2012	2011	Total % Change	% Change Due to		
				Price	Volume/Mix	Currency
North America	\$ 79.5	\$ 69.2	15%	12%	3%	0%
Latin America	84.0	76.3	10%	5%	5%	0%
Asia/Pacific	67.2	62.2	8%	3%	4%	1%
Europe/Middle East/Africa	59.2	42.3	40%	10%	31%	-1%
Total	\$289.9	\$250.0	16%	7%	9%	0%

[Table of Contents](#)

Net sales were up 16%, primarily due to higher selling volumes of 9% and higher selling prices of 7%. The volume increase reflects strong demand for mining products in copper markets, increased demand for our new products despite being in a softening aluminum market and strong demand for phosphine gases and derivative products. Selling prices increased across most product lines to more than offset higher raw material costs.

Earnings from operations were \$74.4 or 26% of sales in 2012, compared with \$49.3, or 20% of sales in 2011. The \$25.1 increase in earnings is principally due to higher selling prices of \$18.3, higher selling volumes of \$15.7, a favorable impact from changes in exchange rates of \$3.5, and net favorable fixed cost absorption of \$3.2 on higher production levels to support increased volumes. This is partially offset by higher costs to support accelerated growth with increased operating expenses of \$7.0 due to increased headcount, additional period costs of \$5.5, higher freight and warehousing costs of \$1.8 on increased volumes and higher raw material costs of \$1.3.

Additive Technologies

	2012	2011	Total % Change	% Change Due to		
				Price	Volume/Mix	Currency
North America	\$ 92.5	\$ 92.3	0%	5%	-5%	0%
Latin America	16.3	17.6	-7%	15%	-15%	-7%
Asia/Pacific	52.3	50.1	4%	-1%	4%	1%
Europe/Middle East/Africa	47.1	60.1	-22%	4%	-19%	-7%
Total	\$208.2	\$220.1	-5%	4%	-7%	-2%

Net sales decreased 5%, as lower selling volumes of 7% were partially offset by selling price increases of 4%. Lower selling volumes relate principally to specialty additives products, which were partially offset by higher volumes for polymer additive products. In Europe, a slowing economy reduced demand for both specialty additives and polymer additives products. Lower demand for specialty additives in North America was partially offset by strong demand for polymer additives in the region. The selling price increases reflect our efforts to recover the higher raw material costs. The impact of changes in exchange rates lowered sales by 2%.

Earnings from operations were \$29.8 or 14% of sales in 2012, compared with \$31.9 or 14% of sales in 2011. The \$2.1 decrease in earnings is due to lower volumes of \$7.8, increased raw material costs of \$2.2 and increased manufacturing period costs of \$2.0 due to wage inflation, benefits, and depreciation. Commercial and administration costs were higher \$0.8 related to wage inflation and benefits. Absorption was also negative \$0.4 resulting from lower sales demand. These were partially offset by price increases of \$9.4 and decreased freight costs of \$1.7 as a result of lower sales volumes. The negative impact of foreign exchange rates on sales was entirely offset by favorable impacts on raw materials and other costs.

LIQUIDITY AND FINANCIAL CONDITION

At September 30, 2012, our cash balance was \$189.5 compared with \$415.8 at December 31, 2011. At September 30, 2012, approximately 91% of our cash was located outside of the U.S.

Net cash provided by continuing operations

Net cash provided by operating activities of continuing operations was \$103.9 in 2012 compared with \$31.5 in 2011. Inventory increased \$37.2 due to increased demand and higher production volumes in Engineered Materials and In-Process Separation. Inventory average days on hand were at 78 days for the third quarter of 2012, which is up compared to the 2011 fourth quarter average of 68 days. Trade accounts receivable increased \$18.1 due to higher sales with average days outstanding of 49 days for the third quarter of 2012, which is in line with the 2011 fourth quarter average of 49 days. Accounts payable decreased by \$9.2, while third quarter 2012 accounts payable average days outstanding were 51 days, which is consistent with the fourth quarter 2011 average days. Accrued expenses increased by \$16.2, due to overall higher accruals as a result of having acquired the Umeco business in the third quarter, as well as restructuring charges incurred during the period. Other liabilities decreased by \$19.2 primarily due to contributions to our pension and postretirement plans and the settlement of the cross currency swaps, offset by liabilities accrued related to the Umeco business as of September 30, 2012. We disclosed in our 2011 Annual Report on Form 10-K that we expected to contribute \$40.7 and \$11.2, respectively, to our pension and postretirement plans in 2012. Expected contributions to our continuing plans were \$35.5 and \$11.2. Through September 30, 2012, actual contributions to our continuing pension and postretirement plans were \$26.8 and \$10.2, respectively.

Net cash used in investing activities of continuing operations was \$529.7 in 2012 compared to \$53.1 in 2011. In the first nine months of 2012, we used \$445.4 in cash to acquire Umeco plc and a business in India to increase our manufacturing capacity in our In-Process Separation segment, as discussed in Note 4 of the Consolidated Financial Statements. In the first nine months of 2011, we received proceeds of \$3.4 from sales of certain real estate and facilities of a former site. Capital spending for the first nine months of 2012 was

[Table of Contents](#)

\$84.3 compared to \$56.5 in 2011. Capital spending in 2012 is primarily attributable to investments for the strategic expansion of our growth businesses within the Engineered Materials and In-Process Separation segments, in addition to maintenance of business capital across the Company. In the second quarter of 2012, we restarted the carbon fiber expansion project that had been put on hold since the first quarter of 2009, to support the growing demand for carbon fiber materials in the aerospace industry. The project is expected to be completed by the end of 2013, with industrial fiber production expected in 2015 and aerospace qualified fiber production expected in 2016. We have also commenced production on a new prepreg manufacturing expansion project, with commercial production expected to occur in 2015. In 2012, we also began expansion of our phosphine plant in Canada for our In-Process Separation segment, expected to be completed in 2014. Our total capital spending for 2012 is expected to be up to approximately \$200.0 for continuing operations.

Net cash provided by financing activities in 2012 was \$17.7, compared to cash used in financing activities of \$141.1 in 2011. During the first nine months of 2012, we received net proceeds of \$11.8 from short and long term borrowings. This was primarily related to the net borrowings of \$25.0 from our Revolving Credit Facility, which was drawn down by \$170.0 for the purpose of funding the Umeco acquisition, and most of which was repaid by September 30, 2012. We also received \$19.7 of proceeds from stock option exercises, and had \$4.6 of excess tax benefits related to share-based payments in the first half of 2012. These proceeds were offset primarily by \$20.2 of cash dividends paid during the first nine months of 2012.

Share repurchases

There were no repurchases of shares of our common stock in the first nine months of 2012. Approximately \$197.9 remained authorized under our stock buyback program as of September 30, 2012. On October 9, 2012, our Board of Directors approved an additional \$452.0 stock buyback authorization, bringing the total authorization to \$650.0. We expect to fund the repurchase program with a portion of the cash proceeds from the sale of the Coating Resins business expected in the first quarter of 2013. Prior to then, any repurchases will be funded by some combination of cash on hand and utilization of a portion of the Revolving Credit Facility. The repurchases will be made in compliance with, and at such times as permitted by, federal securities law and may be suspended or discontinued at any time.

Dividends

On July 19, 2012, the Board of Directors declared a \$0.125 per common share cash dividend, payable on August 24, 2012 to shareholders of record as of August 10, 2012. Cash dividends paid in the third quarter of 2012 and 2011 were \$5.7 and \$6.1, respectively, and for the nine months ended September 30, 2012 and 2011 were \$20.2 and \$21.2, respectively. Dividends paid in the first nine months of 2012 and 2011 include \$3.0 and \$2.8, respectively, paid by a majority owned subsidiary to its minority shareholder. On October 18, 2012, the Board of Directors declared a \$0.125 per common share cash dividend, payable on November 26, 2012 to shareholders of record as of November 9, 2012.

Net cash provided by discontinued operations

Net cash provided by operating activities of discontinued operations for the first nine months of 2012 was \$82.1, compared to \$64.2 for the first nine months of 2011. For 2012 and 2011, these cash flows consisted primarily of the net earnings from discontinued operations from what was formerly our Coating Resins segment, and also included the net earnings from discontinued operations from what was formerly our Building Block Chemicals segment for 2011. In 2011, cash used includes a tax payment of \$13.3 related to the gain on the sale of Building Block Chemicals.

Net cash provided by investing activities of discontinued operations was \$97.4 in 2012, compared to \$128.6 in 2011. For 2012, we received net proceeds of \$112.8 from the sale of the PSA product line in the third quarter of 2012 and proceeds of \$4.0 from the sale of assets, which were offset by \$19.4 of capital expenditures in the Coating Resins business. In the first nine months of 2011, we received cash proceeds of \$152.2, net of transaction costs, related to the sale of our former Building Block Chemicals segment, which were offset by capital spending of \$2.4 for the business prior to the sale, and \$21.3 of capital spending for the former Coating Resins segment.

Funding of future cash requirements

We believe that we have the ability to fund our operating cash requirements and planned capital expenditures as well as the ability to meet our debt service requirements for the foreseeable future from existing cash, internal cash generation and utilization of our Revolving Credit Facility. In addition, from time to time, based on such factors as local tax regulations, prevailing interest rates, our plans for capital investment, acquisitions, or other investments, it may make economic sense to utilize our existing Revolving Credit Facility in order to meet those cash requirements, which may include debt-service related disbursements. We are required to meet financial ratios under our Revolving Credit Facility, including a maximum permitted ratio of Total Consolidated Debt (as defined) to Consolidated EBITDA (as defined) and a minimum consolidated EBITDA (as defined) to interest expense ratio. Complying with these ratios could limit our ability to plan for or react to market conditions or meet extraordinary capital needs and could otherwise restrict our financing activities. Our ability to comply with the covenants will depend on our future operating performance. If we fail to comply with those covenants and terms, we will be in default. In this case, we would be required to obtain waivers from our lenders

[Table of Contents](#)

in order to maintain compliance. If we were unable to obtain any necessary waivers, the amounts outstanding under the Revolving Credit Facility could be accelerated, and become immediately due and payable, and we would not be able to borrow any additional funds under the facility while such default continued. We are in compliance with these covenants and expect to be in compliance for the foreseeable future. We have \$25.0 of borrowings outstanding under the Revolving Credit Facility as of September 30, 2012. Our ability to fully utilize our Revolving Credit Facility can be limited by our actual calculated Debt Covenant Ratio as compared to the maximum Debt Covenant Ratio permitted under the facility. At September 30, 2012, we have an additional \$375.0 of the facility available to us for borrowing.

Use of cash

We have generated a significant amount of cash in recent years. In 2012, our use of cash priority is to invest in the typical maintenance of business capital spending projects and pension contributions. This is followed by expansion/cost reduction capital in our growth product lines and fast payback/margin improvement capital in our cash product lines. We will pursue bolt-on acquisitions for our growth product lines, such as the March 2012 acquisition of the manufacturing assets of a privately held Indian company for \$36.1, which will increase our metal extraction capacity for our In-Process Separation segment, and the acquisition of Umeco plc for approximately \$423.8 to strengthen our position as a leading manufacturer of composite materials, while offering significant opportunities for growth and value creation. We will continue to look to buy back our debt if available at reasonable prices and return excess cash to shareholders through dividends and share repurchases when it is prudent to do so. We have approximately \$650.0 of buyback authorized as of September 30, 2012.

We have not guaranteed any indebtedness of our unconsolidated associated company.

Inflation at this time is not considered significant although higher costs for energy and commodities could impact our future operating expenses and capital spending. The impact of increasing raw material costs are discussed under "Customers and Suppliers" in "Business" in Item 1 in our 2011 Annual Report on Form 10-K.

Contractual Obligations and Commitments

In conjunction with the completion of the sale of our former Building Block Chemicals segment in the first quarter of 2011, we entered into long-term supply agreements with the Purchaser for the supply of two of our key raw materials. Under the terms of the agreements, we are obligated to purchase a substantial amount of our melamine and acrylonitrile needs from the purchaser of our former Building Block Chemicals segment for periods ranging from 3 to 10 years. The prices for the raw materials under the agreements are market-based.

Reference is also made to Note 13 in Notes to Consolidated Financial Statements included herein which describes certain gross liabilities totaling \$25.8 for unrecognized tax benefits for continuing operations that will be resolved at some point over the next several years.

OTHER

2012 OUTLOOK

In our October 18, 2012 press release, which was also furnished as an exhibit to a Current Report on Form 8-K, we presented our outlook for our full year 2012 results at the time based on various assumptions set forth in the press release. There can be no assurance that sales or earnings will develop in the manner projected. Actual results may differ materially. See "Comments on Forward Looking Statements."

Critical Accounting Policies

See "Critical Accounting Policies" under Item 7A of our 2011 Annual Report on Form 10-K, filed with the Securities and Exchange Commission on February 24, 2012, as updated by the Current Report on Form 8-K filed with the SEC on April 19, 2012, related to our changes in reportable segments, and incorporated by reference herein. There were no changes to our critical accounting policies, except as related to depreciation, as discussed in Note 3 of the notes to the consolidated financial statements.

COMMENTS ON FORWARD-LOOKING STATEMENTS

A number of the statements made by us in our Annual Report on Form 10-K, in other documents, including but not limited to the Chairman, President and Chief Executive Officer's and Vice President and Chief Financial Officer's letters to stockholders and stakeholders, respectively, in our press releases and in other reports to the Securities and Exchange Commission, may be regarded as "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. All statements in this report, including those made by the management of Cytec, other than historical statements, are forward-looking statements.

[Table of Contents](#)

Forward-looking statements include, among others, statements concerning: our or any of our segments outlook for the future, anticipated results of acquisitions and divestitures, selling price and raw material cost trends, anticipated changes in currency rates and their effects, economic forces within the industry we operate, anticipated costs, target completion dates and expenditures for capital projects, expected sales growth, operational excellence strategies and their results, expected annual tax rates, our long-term goals, environmental remediation costs, future legal settlements, claims and judgments, and other statements of expectations, beliefs, future plans and strategies, anticipated events or trends and similar expressions concerning matters that are not historical facts. Such statements are based upon our current beliefs and expectations and are subject to significant risks and uncertainties. Actual results may vary materially from those set forth in the forward-looking statements.

The following factors, among others, could affect our anticipated results: our ability to successfully complete planned or ongoing restructuring and capital expansion projects, including realization of the anticipated results from such projects; our ability to successfully conclude changes to our business portfolio through acquisitions and divestitures; our ability to successfully integrate our acquired businesses; our ability to maintain or improve current ratings on our debt; our ability to obtain financing or borrow fully against committed lines, changes in financial conditions or the financial status of our existing lenders markets; changes in global and regional economies; the financial well-being of our customers and the end consumers of our products; changes in demand for our products or in the quality, costs and availability of our raw materials and energy; customer inventory reductions; the actions of competitors; currency and interest rate fluctuations; technological change; our ability to renegotiate expiring long-term contracts; our ability to raise our selling prices when our product costs increase; changes in employee relations, possible strikes or work stoppages at our facilities or at the facilities of our customers or suppliers; new laws and regulations or changes in their interpretation, including those related to taxation, global warming and those particular to the purchase, sale, storage and manufacture of chemicals or operation of chemical plants; governmental funding for those military programs that utilize our products; litigation, including its inherent uncertainty and changes in the number or severity of various types of claims brought against us and changes in the laws applicable to these claims; quality problems; difficulties in plant operations and materials transportation, including those caused by hurricanes or other natural forces; short or long-term climate changes; environmental matters; returns on employee benefit plan assets and changes in the discount rates used to estimate employee benefit liabilities; changes in the medical cost trend rate; changes in accounting principles or new accounting standards; political instability or adverse treatment of foreign operations in any of the significant countries in which we or our customers operate; war, terrorism or sabotage; epidemics; and other unforeseen circumstances. Unless indicated otherwise, the terms “Cytex,” “Company,” “we,” “us,” and “our” each refer collectively to Cytex Industries Inc. and its subsidiaries.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK (Currencies in millions)

For a discussion of market risks at year-end, refer to Item 7A of our Annual Report on Form 10-K for the year ended December 31, 2011, filed with the Securities and Exchange Commission on February 24, 2012, as updated by the Current Report on Form 8-K filed with the SEC on April 19, 2012, related to our changes in reportable segments, and incorporated by reference herein. Other 2012 financial instrument transactions include:

Interest Rate Risk: At September 30, 2012, our outstanding borrowings consisted of \$6.9 of short-term borrowings and \$666.6 of other debt. The debt had a carrying and face value of \$666.6 and \$667.2, respectively, and a fair value of approximately \$757.7.

Assuming other factors are held constant, a hypothetical increase/decrease of 1% in the weighted-average prevailing interest rates on our variable rate debt outstanding as of September 30, 2012, would increase/decrease interest expense by approximately \$0.1 for the next fiscal quarter.

Currency Risk: We periodically enter into currency forward contracts primarily to hedge currency fluctuations of transactions denominated in currencies other than the functional currency of the respective entity. At September 30, 2012, the principal transactions hedged involved accounts receivable and accounts payable. When hedging currency exposures, our practice is to hedge such exposures with forward contracts denominated in the same currency and with similar critical terms as the underlying exposure, and therefore, the instruments are effective at generating offsetting changes in the fair value, cash flows or future earnings of the hedged item or transaction.

At September 30, 2012, the currency and net contractual amounts of forward contracts outstanding translated into U. S. dollar equivalent amounts totaled \$573.2. The unfavorable fair value of currency contracts, based on forward exchange rates at September 30, 2012, was approximately \$5.4. Assuming that period-end exchange rates between the underlying currencies of all outstanding contracts and the various hedged currencies was to adversely change by a hypothetical 10%, the fair value of all outstanding contracts at September 30, 2012 would decrease by approximately \$49.3. However, since these contracts economically hedge specific transactions, any change in the fair value of the contracts would be offset by changes in the underlying value of the item or transaction being hedged.

[Table of Contents](#)

Item 4. CONTROLS AND PROCEDURES

We carried out an evaluation, under the supervision and with the participation of the management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures as required by Exchange Act Rule 13a-15(b) as of the period ended September 30, 2012. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures are effective.

Changes in Internal Control Over Financial Reporting

The Umeco acquisition on July 20, 2012, resulted in a material change in internal control over financial reporting. Umeco utilizes separate information and accounting systems and processes. With the exception of the change in internal control over financial reporting from the Umeco acquisition, there have not been any changes in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the quarter ended September 30, 2012 that have materially affected, or are reasonably likely to material affect, our internal control over financial reporting.

PART II—OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

Information regarding legal proceedings is included in Note 11 to the Consolidated Financial Statements herein and in Note 11 to the Consolidated Financial Statements contained in our 2011 Annual Report on Form 10-K.

Item 1A. RISK FACTOR

The following risk factor was updated in the second quarter of 2012.

Our acquisition of Umeco involves a number of integration risks. The occurrence of any of the events described in these risks could cause a material adverse effect on our business, financial position and results of operations and could cause the market price of our common stock to decline.

Successful integration of Umeco is critical to our business and strategic plans. If we are unable to successfully integrate Umeco into our business in an efficient and effective manner, or at all, we could fail to realize all of the anticipated benefits of the acquisition, such as increased revenue, cost savings, synergies and growth opportunities, within the anticipated time frame or at all. The integration process could disrupt our business and an unsuccessful integration could have a material adverse effect on our business, financial results and results of operations. In addition, the integration could result in unanticipated problems, expenses, liabilities, competitive responses and diversion of management's attention and may cause the market price of our common stock to decline. Potential difficulties of integration include, among others: (1) inability to successfully integrate operations, technologies, products, personnel and business systems; (2) unanticipated issues in integrating information, communications and other systems; (3) retaining key employees; (4) retaining customers; (5) preserving strategic relationships; (6) integrating legal and financial controls; (7) diversion of management's attention from ongoing business concerns; (8) integrating geographically separate organizations; (9) tax issues; and (10) complying with laws, rules and regulations in multiple jurisdictions, including employment regulations and U.S. export controls. Additional risks could also have a material adverse effect on our business, financial results and results of operations.

Item 6. EXHIBITS

(a) Exhibits

See Exhibit Index on page 43 for exhibits filed with this Quarterly Report on Form 10-Q.

CERTIFICATIONS

I, Shane Fleming, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Cytec Industries Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls over financial reporting.
