First Quarter 2019 Results

May 7, 2019
Investor relations

IFRS 16 has been implemented in the Group's financial statements since January 1, 2019. Comparative information for the first quarter of 2018 in the business review is presented on an unaudited pro forma basis as if the implementation had taken place on January 1, 2018. This information is labelled "pro forma" or "PF". The balance sheet evolution is compared with January 1, 2019, which includes the IFRS 16 impact versus December 31, 2018.

Besides IFRS accounts, Solvay also presents underlying Income Statement performance indicators to provide a more consistent and comparable indication of the Group's financial performance. The underlying performance indicators adjust IFRS figures for the non-cash Purchase Price Allocation (PPA) accounting impacts related to acquisitions, for the coupons of perpetual hybrid bonds, classified as equity under IFRS but treated as debt in the underlying statements, and for other elements that would distort the analysis of the Group's underlying performance.

Realigned executive committee

Built on extensive experience and business leadership

New Executive Committee

- Simplified to 4 business leaders and the CEO
- Human Resources Officer (to be hired)

New accountabilities & responsibilities

- Portfolio P&L responsibility
- Strategic transversal growth platforms

Value creation

- Customer is the center of everything we do
- Disciplined resource allocation for the enterprise
- Innovation focused

Performance Chemicals

Solid demand and higher pricing

Soda ash &
Peroxide
chemicals

Market drivers

→ Solid demand

Good demand in soda ash and peroxides markets

→ Positive pricing

*Pricing well up in soda ash this year;
Peroxides prices also supportive*

Our markets

Our delivery

Organic sales growth **+7.4%**

→ Volume and mix impact +1.1%

→ Pricing impact +6.3%

Organic EBITDA growth **+9.9%**

EBITDA margin **29%**

Pie-chart represents 2018 net sales per end-market

Positive net pricing offsets volume decline Leading to sustained EBITDA margin

Underlying EBITDA largely stable organically

- Lower **volume** in core markets including automotive, electronics and oil & gas; strong performance in aerospace
- Positive **net pricing** offsets higher raw material and energy prices
- **Fixed costs** reflecting wage inflation and the expanded production capabilities in Composite Materials

Underlying EPS +1% from continuing operations

- Positive effect of forex conversion
- Total EPS up +18%, including strong contribution from discontinued operations

Working capital and inventory weighed on free cash flow generation

FCF to Solvay shareholders from continuing operations at € (91) million

- Working capital phasing
- Higher inventories due to slowdown in automotive, electronics and oil & gas markets
- Capex discipline maintained

Total FCF to Solvay shareholders at € (32) million

- Including strong contribution from discontinued operations of €58 million

Underlying leverage ratio maintained at 2.1x

- Net financial debt at €(5.8) billion

2019 outlook adjusted to current market context

EBITDA growth

Underlying
excluding scope and forex conversion

- Organic growth ^[1]
flat to modest decline
- Q2 down versus 2018

Free Cash Flow

to Solvay shareholders
from continuing operations

- **€490 million** ^[2]
exceeding dividend pay-out
- Allowing for debt deleveraging
of ~€100 million

[1] Organic growth, excluding scope & forex conversion effects and IFRS 16 effect, compared to 2018 pro forma of €2,330 million

[2] vs 2018 pro forma of €566 million, already including IFRS 16 effect

Q1 2019 RESULTS

ADDITIONAL INFORMATION

Organic sales flat with lower volumes offset by higher prices

Net sales

(in € million)

Volume growth

- **Advanced Materials** → strong decline in demand from automotive and electronics as well as some destocking, partially offset by double-digit growth in aerospace
- **Advanced Formulations** → volume decline led by North American oil & gas market
- **Performance Chemicals** → slightly higher volumes thanks to solid demand for soda ash and peroxides

Forex & scope effects ^[1]

- Supportive forex conversion on stronger US dollar mainly
- Minor negative effect from scope reduction ^[1]

Underlying EBITDA

Positive net pricing offsets volume headwinds

organic growth **-5.7%**

Advanced Materials

- Higher prices and volume growth in aerospace did not offset lower demand in automotive and electronics
- Excellence measures only partially offset higher variable costs (Fluorspar)

organic growth **-1.7%**

Advanced Formulations

- Positive net pricing offset only partially lower oil & gas volumes in North America
- Other markets, including mining, remained overall supportive

organic growth
+9.9%

Performance Chemicals

- Strong performance in peroxides and soda ash, supporting volumes and pricing.
- Higher prices and excellence programs more than compensated higher raw material and energy costs

EPS supported by higher contribution from discontinued operations

Underlying EPS from continuing operations up 1%

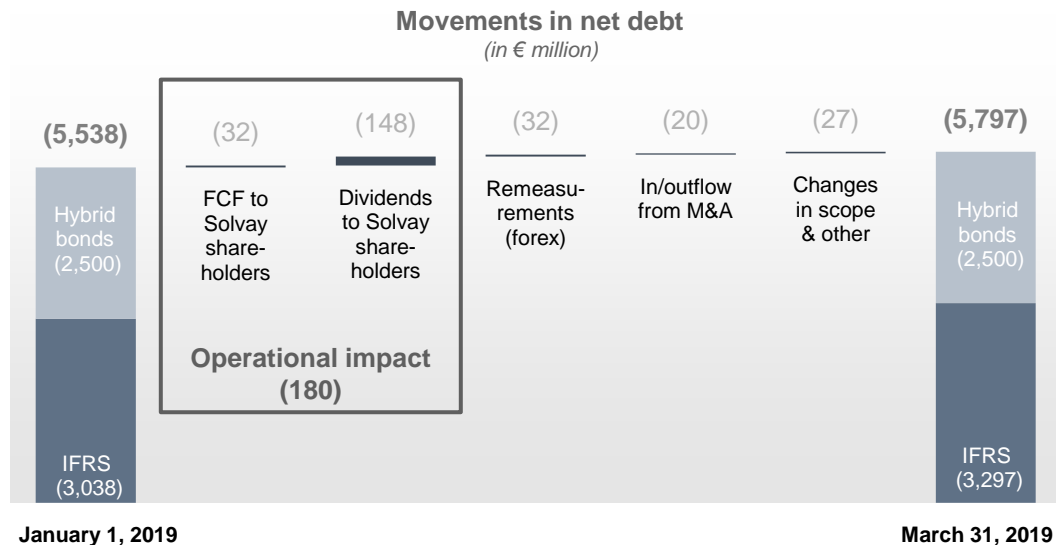

- Positive impact from forex conversion on EBITDA
- Higher tax rate offset by lower net financial charges

Underlying EPS up 18%

- Higher contribution from discontinued operations (good performance of the polyamide activities to be sold to BASF)

IFRS EPS at €2.21

Net debt seasonally up

WC phasing limiting FCF delivery

Interim dividend payments in Q1

Negative impact from appreciation of US\$ on net debt

Leverage ratio remains flat at 2.1x

Provisions slightly up with actuarial assumptions (31/12/2018)

Efficient capital structure leading to reduced cost of debt

Underlying financial debt ^[1] evolution in € billion

DELEVERAGING CONTINUES

2019 P&L Considerations

UNDERLYING EBITDA

EBITDA to be flat to modestly down organically and to be back-ended compared to €2,330 million pro forma in 2018

- Except for discontinued operations, business scope effects are expected to be small in 2019.
- One-time gains in 2018 consisted mainly of €23 million synergies on Cytec post-retirement benefits, booked in Q2 2018 (mostly in Advanced Materials).
- Organic growth in the second quarter is expected down versus €643 million pro forma in Q2 2018.

FCF TO SOLVAY SHAREHOLDERS

Deleveraging of the balance sheet with continued solid operational free cash flow delivery

- Capex discipline maintained, close to depreciation;
- Cash-out for provisions are expected temporarily higher than the €400 million run rate, with higher restructuring cash-out as the simplification plan unfolds. Provisions cash-out includes continued deleveraging of pension liabilities;
- Tax cash-out expected to increase, linked to phasing;
- Cash financial expenses expected largely flat;
- Working capital needs will depend on demand conditions at year end 2019, compared to a softer market conditions at year end 2018.

FOREX SENSITIVITY

Mostly exposed to the U.S. dollar, with the main sensitivities per US\$/€0.10 change:

- EBITDA sensitivity of ~€(120) million based on average 2018 rate in 2018 of US\$/€1.18
 - ~2/3 on conversion
 - ~1/3 on transaction, the latter being mostly hedged.
- Net debt sensitivity of ~€120 million based on the end 2018 rate of US\$/€1.15

IFRS 16 to affect EBITDA, P&L & debt

- IFRS 16 implementation
 - Capitalizes leases, previously considered as operating leases
 - Taking effect for 2019 accounts
 - Solvay is opting for a modified retrospective implementation of 2018, instead of a full restatement
- Previous year figures to be presented pro forma
 - EBITDA, depreciation, financial charges, capex and net financial debt increase
 - Profit for the period decreases slightly
 - Free cash flow to Solvay shareholders remains unchanged

2018 key figures (in € m)	published	IFRS 16	pro forma
EBITDA	2,230	+100	2,330
Advanced Materials	1,197	+28	1,225

R&I intensity	3.4%	3.9%	3.2%	1.0%

^[1] **Cash Flow Return On Investment** measures the cash returns of Solvay's business activities. Movements in CFROI levels are relevant indicators for showing whether economic value is being added, though it is accepted that this measure cannot be benchmarked or compared with industry peers. The definition uses a reasonable estimate of the replacement cost of assets and avoids accounting distortions, e.g. for impairments. It is calculated as the ratio between recurring cash flow and invested capital, where: **Recurring cash flow** = Underlying EBITDA + Dividends from associates and JVs - Earnings from associates and JVs + Recurring capex + Recurring income taxes; **Invested capital** = Replacement value of goodwill & fixed assets + Net working capital + Carrying amount of associates and JVs; **Recurring capex** is normalized at 2% of the replacement value of fixed assets net of goodwill values; **Recurring income tax** is normalized at 30% of (Underlying EBIT - Earnings from associates and JVs)

Why invest in solvay?

Leading Advanced Materials and Specialty Chemicals company

Top-notch chemistry that addresses sustainable mobility and improves resource efficiency, creating financial value & value for society at large.

1

Innovative and sustainable solutions to the market of the future

Innovation towards impactful circular economy ; collaboration with game-changers to spark the impact of cleaner and sustainable solutions globally.

2

Customer obsession

Answers to fast-pacing demand: rapid technological innovation, top-tier talent, personalized service and faster response times.

3

Solid Financial Performance

One of the highest EBITDA margins within diversified chemical companies: propelled by volumes, underpinned by efficiency.

4

Consistent Shareholders Reward

Dividend Increase for 35 years
2018 dividend: €3.75
~5.5% CAGR since 1982.
