

INTEROX[®] HYDROGEN PEROXIDE PULP BLEACHING Statement

USE OF INTEROX[®] TECHNICAL GRADE HYDROGEN PEROXIDE IN PULP BLEACHING

Hydrogen peroxide used for bleaching pulp, paper or board intended for food contact applications is regulated under the FDA's Indirect Food Additives, 21 CFR §174.

Hydrogen peroxide is approved for direct use in food and is GRAS; therefore its use in indirect food applications is also approved.

The hydrogen peroxide used in bleaching pulp, paper or board intended for food contact does not need to meet Food Chemicals Codex requirements. It only has to be "of a purity suitable for its intended use" and therefore the INTEROX[®] Technical or Dilution Grade hydrogen peroxide products are acceptable.

To our actual knowledge, the information contained herein is accurate as of the date of this document. However, neither Solvay Chemicals, Inc., nor any of its affiliates, makes any warranty, express or implied, or accepts any liability in connection with this information or its use. This information is for use by technically skilled persons at their own discretion and risk and does not relate to the use of this product in combination with any other substance or any other process. This is not a license under any patent or other proprietary right. The user alone must finally determine suitability of any information or material for any contemplated use in compliance with applicable law, the manner of use and whether any patents are infringed. This information gives typical properties only and is not to be used for specification purposes.
