

Solvay starts up new Hydrogen Peroxide dilution and packing plant in Vietnam

Brussels, June 19th 2020 --- Solvay Peroxides Vietnam started production at its new Hydrogen Peroxide dilution and packing plant at Phuc Long Industrial Zone in Long An Province, Vietnam. This facility is designed to reach 24k ton capacity per year to meet growing local demand for international standard quality Hydrogen Peroxide for the textile industry and other applications.

Being the first industrial facility based in Vietnam of the Solvay group, this plant was built and made operational in full alignment with the group's Health Safety & environmental standards. High quality Hydrogen Peroxides are supplied by Solvay Peroxythai, our world largest plant in Thailand and diluted and packed to customer requirements locally.

"With this new plant we are aiming at better serving our customers in Vietnam. To support sustainability and circular economy, the use of returnable packaging has been implemented with our distributors and customers. This action allows customers to minimize the non core operation of managing used packaging." said Suthichai Srihawan, General Manager of Solvay Peroxides Vietnam.

About Solvay

Solvay is a science company whose technologies bring benefits to many aspects of daily life. With more than 24,100 employees in 64 countries, Solvay bonds people, ideas and elements to reinvent progress. The Group seeks to create sustainable shared value for all, notably through its Solvay One Planet plan crafted around three pillars: protecting the climate, preserving resources and fostering better life. The Group's innovative solutions contribute to safer, cleaner, and more sustainable products found in homes, food and consumer goods, planes, cars, batteries, smart devices, health care applications, water and air purification systems. Founded in 1863, Solvay today ranks among the world's top three companies for the vast majority of its activities and delivered net sales of €10.2 billion in 2019. Solvay is listed on Euronext Brussels (SOLB) and Paris and in the United States, where its shares (SOLVY) are traded through a Level I ADR program. Learn more at www.solvay.com.

SOLVAY PEROXIDES Global Business Unit is a worldwide market and technology leader in Hydrogen Peroxide. Providing functional qualities such as bleaching, oxidation or disinfection, it delivers innovative products and tailored services to the pulp, chemicals, aquaculture, food, mining, wastewater treatment, home care and textile industries. SOLVAY PEROXIDES operates 19 plants in North and South America, Europe & Middle East, Asia and Australia. It runs the world's biggest Hydrogen Peroxide plant in Map Ta Phut (Thailand). With its JV partner Peróxidos do Brasil, Solvay Peroxides is developing a new plant concept, myH2O2®, especially designed for installation at customer sites in remote locations. Innovation capacity and agility are two of GBU Peroxides' strengths.
