Solvay and Henkel team up to double the number of Indian farmers in the Sustainable Guar Initiative

Brussels, November 16, 2017 --- Solvay has expanded its **Sustainable Guar Initiative** with **Henkel** joining as a new partner to help more than double the number of Indian farmers involved in this project to 6,500 by 2020.

The Sustainable Guar Initiative, implemented by non-profit organization **TechnoServe**, teaches and promotes sustainable agricultural practices among 3,000 guar bean farmers across twenty villages in the desert region of Bikaner, Rajasthan. Solvay as the world leader in guar derivatives used in home and personal care and other applications, initiated the project in 2015.

"Solvay welcomes Henkel as its partner to build on the success of this project, which improves the daily lives of the farmers and families while also benefiting various industrial uses. With this program, we aim to generate a long-term sustainable, fair and transparent value chain, from the guar farmer up to our most engaged customers," said Emmanuel Butstraen, President of Solvay's Novecare Global Business Unit.

"At Henkel, we recognize our responsibilities regarding ingredients based on renewable raw materials that we use in our products," said Thomas Foerster, Corporate Vice President R&D Henkel Beauty Care. "We want to drive sustainability on the ground by teaming up with partners like Solvay and TechnoServe to directly support guar bean farmers in India. By empowering farmers and promoting sustainable farming methods, we aim to increase the global supply of sustainably-cultivated guar while also improving living and working conditions."

"Guar is a critical income source of income for farmers in this area of India, and learning sustainable agronomic techniques greatly enhances their livelihoods and the well-being of their families," said William Warshauer, President and CEO of TechnoServe. "These kinds of projects, which engage forward-thinking companies like Solvay and Henkel, are essential to sustainable development and are core to TechnoServe's work worldwide."
