HYDROGEN PEROXIDE

Conflict Minerals Statement

CONFLICT MINERALS STATEMENT HYDROGEN PEROXIDE PRODUCTS PRODUCED IN NAFTA

Solvay Chemicals Inc. is committed to sourcing its materials from companies that share its values with regard to human rights, ethical behavior and sustainable development. We expect our suppliers to share the same values and to follow all laws and regulations governing their activities.

The Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, Section 1502(e)(4), requires all companies filing certain reports with the SEC to disclose annually whether the products they manufacture or contract to manufacture contain "conflict minerals" that are necessary to the functionality or production of those products ("the Conflict Minerals Rule"). Conflict minerals include tin, tungsten, tantalum, and gold sourced from the Democratic Republic of the Congo or adjoining countries (Angola, Burundi, Central African Republic, Rwanda, South Sudan, Tanzania, Uganda or Zambia). While Solvay Chemicals Inc. is not subject to the rules and regulations promulgated by the United States Securities and Exchange Commission, many of its customers do file reports with the SEC.

Solvay Chemicals, Inc. seeks to assure its customers of its commitment to and support of the principles enunciated in the Conflict Minerals Rule. First, Solvay Chemicals, Inc. acknowledges the use of tin in the manufacturing of certain hydrogen peroxide products, serving primarily as a stabilizer. Most importantly, Solvay Chemicals, Inc. can state, based on information provided by its raw material suppliers, that to the best of its knowledge, its products and, specifically, Hydrogen Peroxide, Peracetic Acid (PAA) and Sodium Carbonate Peroxyhydrate (Sodium Percarbonate (PCS)), do not contain conflict minerals as defined under the Conflict Minerals Rule.

Solvay Chemicals, Inc. will continue to make every effort to ensure that its product sourcing is done through responsible suppliers that uphold its values and pledge to comply with all applicable laws and regulations, including the Conflict Minerals Rule.

To our actual knowledge, the information contained herein is accurate as of the date of this document. However, neither Solvay Chemicals, Inc., nor any of its affiliates, makes any warranty, express or implied, or accepts any liability in connection with this information or its use. This information is for use by technically skilled persons at their own discretion and risk and does not relate to the use of this product in combination with any other substance or any other process. This is not a license under any patent or other proprietary right. The user alone must finally determine suitability of any information or material for any contemplated use in compliance with applicable law, the manner of use and whether any patents are infringed. This information gives typical properties only and is not to be used for specification purposes. Solvay Chemicals, Inc. reserves the right to make additions, deletions or modifications to the information at any time without prior notification.
