Emergency Instructions for our Neighbours

GO IN, STAY IN, TUNE IN

If you hear the two-tone warble warning siren (apart from the test at 10:00 am on the first Monday of each month):

1. Go immediately into a house or building.
2. Look out for and assist any elderly, deaf, blind or disabled neighbours.

3. Close all doors and windows and pull curtains or blinds across any windows facing our site.
4. Stay in a room furthest away from the industrial area.
5. Whilst the emergency is in progress, do not leave your home. If you have children at school, which may or may not be in the affected area, please contact the school by telephone.

6. Switch off any ventilation and air conditioning systems.
7. Tune in to BBC Radio Manchester (FM 95.1) or Wire FM (FM 107.2) which will be used to broadcast information or instructions. You can also listen online at www.bbc.co.uk/manchester or www.wirefm.com

8. Only use the telephone for essential needs until the emergency is over to ensure lines are free for emergency services to use.
9. Please cooperate fully with any instructions given by the emergency services.

10. Remain indoors until you hear the all-clear signal, a single tone siren, or you receive instructions from the Police.

For your safety, access to the surrounding area may be restricted during a major accident.
