Solvay and Syensqo, as data controllers, collect and process personal data relating to you in order to offer you to apply online for a job in Solvay and/or Syensqo and to allow us to manage your application. We are committed to being transparent about how we collect and use such data.

Below you will find more information about the conditions under which we process your personal data as controllers (i.e. the legal entity which decides on the purposes and means of the processing of your personal data), and/or processors (i.e. the legal entity which processes personal data on behalf of the controller), your rights and our obligations in relation to such processing pursuant to the EU General Data Protection Regulation 2016/679 (“GDPR”).

What is “personal data”?

Personal data means the data we collect about you and that can be used to identify you directly (i.e. based on a piece of data alone such as name, surname, mail adresse etc.) or indirectly (i.e. from that data in combination with other data that is available or likely to be available).

What personal data is collected about me?

We may collect and process the following categories of personal data, as part of our activities and, where applicable, legal obligations as employer:

- identification data such as name, surname, address, place and date of birth, civil status, language, nationality, gender, age or disability , education history, professional experience, relevant skills, seniority, CV, hobbies, qualifications and letters of application, letters of recommendation. Some additional information such as your ethnic origin or ID documents might be legally required in some countries.

For example your web browser or mobile device may share certain data with Solvay and Syensqo as those devices interact with our websites. More information about these practices is included in our cookie policy.

When using the recruiting tool features to apply to a job opening, you are solely responsible for collecting, inputting and updating all your data that you provide us when using the recruiting tool and for ensuring:

Why is my personal data collected and on which legal basis?

Legal basis for the processing

We are not allowed to process personal data if we do not have a valid legal ground. Therefore, we are allowed to process your personal data for the following purposes:

- take pre-contractual steps upon your recruitment, as the case may be, if our recruiting team finds that your application fits to an open job opportunity;
- join our Talent Community and be regularly informed about our latest news and receive new posting notifications and alerts, as part of our legitimate interests.

Please note that the provision of certain personal data is necessary for us to enter into a contract with you and perform our obligations under such contract. Failure to provide the necessary personal data will hinder our ability to properly manage your application and offer you the possibility to apply online for a job in Solvay and/or Syensqo.

Please do not transmit sensitive information to us such as your political opinion, your philosophical and religious opinion, your membership of a trade union or a political party, your physical and mental health, your sexual orientation, or a legal proceeding.

Purposes of the processing

We require your personal data to carry out our activities and, where applicable, fulfill our obligations as your (future) employer, and in particular for the following specific purposes:

- we collect your personal data with the aim to enable you to apply online and to allow us to manage your application. If our recruiting team finds

that your profile matches a job opportunity, you may be contacted to move forward in the selection process.

Who has access to my personal data?

In the course of our activities under this recruiting process and for the same purposes as those mentioned above, your personal data can be accessed by or shared internally (e.g. with members of our HR teams, line managers, internal advisors (e.g. legal department) and IT staff and administrators). For application to Solvay, only Solvay staff will access your data. For application to Syensqo, both Syensqo and Solvay staff will access your data, Solvay being contracted as Syensqo data processor. Such access will be limited to strictly authorized personnel on a need-to-know basis.

Your personal data may also be accessed by and shared with the following categories of recipients to achieve the above purposes:

- third parties who process personal data, such as our IT systems providers, cloud services providers, database providers and security service providers and only to authorized persons who may need to access to your personal data in order to streamline and improve the recruitment process;
- our external advisors, external lawyers, accountants and consultants in order to ensure legal and regulatory compliance of the recruitment process;
- where required by applicable law or at their request, national judicial courts, arbitrators, mediators, inspection services and tax authorities;

The personal data transferred internally or externally as set out in this section may also be processed in a country outside the European Economic Area ("EEA") not offering an adequate level of personal data protection.

If your personal data is transferred to such countries, we guarantee that appropriate safeguards are ensured. We can offer you any additional information in this respect about the applicable safeguard upon your request, if you wish to exercise your rights as set out below.

For how long is my personal data stored?

We will only retain your personal data for as long as necessary to fulfill the purposes for which it is collected and processed or to comply with our legal or regulatory requirements.

We will purge your personal data collected for the candidate profile i) after a 6 month period starting either from i) your or the administrator's deletion of your profile or ii) immediately after a 6 month-period of inactivity on your profile (if you have not logged to your profile for 6 months). In the latter case, we will send you a candidature purge notification one (1) month before the end of the 6 month delay to warn you that without any log to your profile the personal data is purged in one month.

In any case, your personal data for the candidate profile will not be purged while a job offer to which you applied is still active.

The personal data collected for a job offer to which you applied will be purged at the end of a six (6) month period following a closed, withdrawn or disqualified job application status.

What are my rights in relation to the processing of my personal data?

As a data subject, you have a number of rights. Under the conditions and within the limits of the GDPR, you can:

- access and obtain a copy of your personal data on request;
- require that we rectify your inaccurate or incomplete personal data;
- require that we erase or stop processing your data (e.g. where the data is no longer necessary for the purposes of processing);
- require the restriction of your personal data processing;

- request that the personal data you have provided to us be returned to you or transferred to someone else in a structured, commonly used and machine-readable format. The latter right must be exercised in compliance with your confidentiality duties; or
- withdraw your consent where we relied on the latter to process personal data (without this withdrawal affecting the lawfulness of processing prior to the withdrawal).

If you would like to exercise any of these rights, please contact the following address: privacy@solvay.com.

In addition, you also have the right - if you believe that we have not complied with your data protection rights - to lodge a complaint with the supervisory authority of the country or region of your usual place of residence, your place of work or the place of the alleged infringement.

How do we ensure the protection of my personal data?

We have implemented adequate technical and organizational measures to ensure that your data is not lost, accidentally destroyed, misused or disclosed, and is not accessed by unauthorized individuals.
