

We are committed to safeguard People, decrease our impact on the Environment and ensure our product stewardship over its life cycle. We create a culture of continuous improvement of our operations and technologies

Solvay's Responsible Care Policy

We are committed to:

- Ensuring our facilities are designed and operated to protect the health and safety of our employees and contractors, while minimizing the impact to the environment and communities.
- Continuously reduce the consumption of energy, raw materials, while reducing emissions, waste generation, and water use.
- Listening and collaborating with stakeholders, notably customers, authorities and the communities we operate in to address their expectations and communicate openly on our activities and performance.

Approved by ELT 06.2.2024

by deploying effective processes:

- Respecting our **Procedures and Guidelines** on Occupational health and safety, Process, transport safety, product safety, and security.
- Applying the requirements of our **Product Stewardship Management System**, including the promotion of substitution for Solvay SVHCs when possible.
- Enhancing security using a threat- and risk-based approach based on the **Responsible Care Security Code**.
- Improving our HSE and distribution processes through **audits**, identification of **priority risks**, monitoring of **performance indicators**.
- Optimizing our use of energy towards renewable and lower Greenhouse Gases emissions, within our **Energy transition program**.
- Pursuing performance improvement in high materiality topics for the Group (nature and people), along targets framed by our **Sustainability strategy**.
- Externally benchmarking our sustainability management and performance through assessments by **selected externally recognized agencies**.
