

THE FUTURE OF TRANSPORTATION

63% think drones will deliver their takeout by 2027

62% think the majority of cars on the road will be electric vehicles by 2030

3 things would help more people get on board with electric vehicles:

47% Increasing reliability and reducing repair costs

40% Implementing more charging stations

37% Reducing charge time

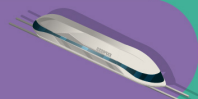

67%

expect transportation will soon look different than it does now, mentioning:

Space trips/tours

Hyperloop travel

Autonomous airplanes

A transatlantic tunnel

66% are concerned about the transportation industry's impact on climate change

But many think we're moving in the right direction:

68% say they could see themselves purchasing an electric vehicle
