Solvay showcases its Peroxides business capabilities and growth prospects

The Group held a webinar focused on its peroxides activities, to be a part of the future EssentialCo

Brussels, October 5, 2022

Solvay held a [webinar](#) for the investment community on its Peroxides activities that will be part of the future EssentialCo. This webinar marked a continuation of Solvay's series that began in December 2021 with an [One Planet roadmap update](#), followed by the materials supplied to the [Automotive and battery industry](#) and its activities related to the [Consumer](#) markets.

In this webinar, management explained the potential to grow Peroxides sales organically by more than 5% over the next 5 years while maintaining cash conversion above 80%, driven by:

- Unique technological process recognised as being “best-in-class” - delivering lowest cost, high purity, and greatest reliability with a very high level of safety.
- Proven expertise with mega-plants, built into integrated chemical complexes, producing H₂O₂ as feedstock for propylene oxide in the framework of HPPO (or Hydrogen Peroxide to Propylene Oxide) partnerships.
- Exposure to the most attractive market segments in peroxides, with products used in a wide variety of established and newer, innovative applications like electronics, battery recycling, and urban mining applications, where H₂O₂ can be an effective and sustainable enabler to these emerging markets.

A replay of this presentation is available on Solvay's Investor Relations [website](#).

About Solvay

Solvay is a science company whose technologies bring benefits to many aspects of daily life. With more than 21,000 employees in 63 countries, Solvay bonds people, ideas and elements to reinvent progress. The Group seeks to create sustainable shared value for all, notably through its Solvay One Planet roadmap crafted around three pillars: protecting the climate, preserving resources and fostering a better life. The Group's innovative solutions contribute to safer, cleaner, and more sustainable products found in homes, food and consumer goods, planes, cars, batteries, smart devices, health care applications, water and air purification systems. Founded in 1863, Solvay today ranks among the world's top three companies for the vast majority of its activities and delivered net sales of €10.1 billion in 2021. Solvay is listed on Euronext Brussels and Paris (SOLB). Learn more at www.solvay.com.
